B OOKS may be taken from the State Library by the members of the General Assembly and its officers during the session of the Legislature, and at any time by the Governor, and the officers of the Executive Department of this State who are required to keep their offices at the seat of gov-

ernment, and the Justices of the Supreme and Appellate Courts.

No person shall be allowed to take any book or property from the Library without executing a receipt therefor, nor to take or detain from the

Library more than two volumes of miscellaneous

works at any one time.

No miscellaneous works shall be detained more than two weeks. All Laws, Journals, etc., taken by members of the Legislature shall be returned at the

close of the session.

If any person injures, or fails to return any book taken from the Library within the time above mentioned, HE SHALL FORFEIT AND PAY TO THE LIBRARIAN, for the benefit of the Library, THREE TIMES THE VALUE THEREOF, or of the set to which it belongs.

Any person, not above mentioned, who takes books or other articles from the State Library without the consent of the Librarian will be prosecuted for

larceny.

Any person taking books from the State Library without reporting the same to the Librarian or assistant, and causing the same to be properly charged upon the Register, will be prosecuted to the full extent of the law.

No entry of charge or return of books will be permitted to be made, except by the Librarian or

assistant.

Persons using books of the Library will return the same to the Librarian or assistant. JAMES A. ROSE.

Secretary of State and ex-officio State Librarian.

## STATE OF ILLINOIS, OFFICE OF THE BUREAU OF LABOR STATISTICS,

Springfield, Jan. 1, 1908.

Honorable Charles S. Deneen, Governor of Illinois:

SIR—I have the honor, on behalf of the Board of Commissioners of Labor, to submit herewith the twenty-sixth annual report of the coal industry of the State for the year ended, July 1, 1907, together with the ninth annual report of the Illinois Free Employment offices, for the year ended Sept. 30, 1907.

Very respectfully,

David Ross, Secretary.

### TABLE OF CONTENTS.

Twenty-sixth Annual Coal Report, 1907	1
Coal in Illinois	1
Summary for the year	1
Classification of mines	3
Increase or decrease, mines, men and tons	4
Shipping and local mines	5
All mines, men and tons	6
Grouping of mines by output.	8
Classification of mines as to tonnage	9
Grouping of mines, 25 years	10
Grouping of mines by tonnage, 16 years	12
Mines of largest output, with location	14
Mines, with location, producing more than 200,000 tons, days of active opera	
tion, thickness of seam	17
Mines producing 50,000 tons and over for 12 years	20
Number of mines, with gain and loss for the year	21
Number of all mines, with gain and loss for 18 years	22
Shipping mines, opened and closed 17 years	23
Shipping mines by districts for 12 years	24
Shipping mines by districts and counties for the years 1906-1907	25
All shipping mines, with distribution of output	27
Proprietorship of shipping mines for four years	38
Location of all shipping mines, postoffice and county	39
Graded output for the year	44
Graded output for the years	46
Mines, men and tons for 26 years	47
Men employed, total output, with gain and loss for 26 years	48
Output of shipping mines, each calendar month of the year	50
Percentages of the output for each month	54
Tons and percentages of the output for the first and second six months of the	94
year. Haulage in the mines.	55
	56
Motor haulage in the mines by districts	57
Counties, relative rank producing 500,000 tons for 10 years	60
Coal producing counties of the State, mines, men and tons	62
Disposition of the output	64
Shipping and local mines, output and distribution for eight years	66
Disposition of the output by districts and countles	67 70
Distribution of coal to railroads by counties	
Railroads, coal delivered to each at the mines	75
Counties furnishing coal to railroads	76
Countles, total production and distribution of total output	81
Days of active operation by districts	83
Mines, men and average working days for 15 years	84
Avearge value per ton, different grades of coal, by districts	86
Total tons and average value per ton, different grades, for eight year	88
Average value of lump coal per ton at the mines, 26 years	90

	PAGE.
Mine employés by districts	. 91
Classification of employés of mines for nine years	. 92
Employés in all mines by districts for 25 years	
Prices paid for hand and machine mining for the year and for seven years	
Earnings of miners by districts and for seven years	96
Machine mining by districts	97
Machine mining by districts	. 94
Machine mining for eight years	
Name and number of mining machines by districts	
Mining machines in use for eight years	
Mines in which machines are used exclusively, with number of machines and ton	
Number of machines in use, mines, men. days, tons	
Mines in which machines are used partly	. 103
Powder used in mines by districts and eight years	. 105
Distribution of powder, shipping mines, by districts	. 106
Powder used, shipping mines, hand and machine mining by districts	. 107
Blasting coal in the mines by districts	. 109
Summary of all mines	
Fatal accidents for the year by districts.	
Fatal accidents for 25 years, men, tons and ratio for 25 years.	
Fatal accidents, averages and proportions, 25 years.	
Fatal accidents by causes for the year.	
Fatal accidents by leading causes.	
Fatal accidents caused primarily by explosions, etc., for the year by district	
and seven years	
Fatal and non-fatal accidents, by causes	
Fatal accidents by falls and other causes for 25 years	
Fatal accidents, occupations and conjugal relations of men killed	
Fatal accidents in coal mines by states	
Non-fatal accidents for year by districts	. 128
Non-fatal accidents for 25 years	. 129
Non-fatal accidents by occupations	. 130
Non-fatal accidents, conjugal relationship, by districts	
	. 131
Non-fatal accidents, classification of causes by districts	. 132
Non-fatal accidents, classification of causes by districts	132
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.	. 132 . 134
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years	. 132 : . 134 135
Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years Non-fatal accidents caused by use of powder and other causes for seven years Non-fatal accidents by falling roof and sides, for 25 years.	. 132 . 134 . 135
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years  Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages, 25 years.	. 132 . 134 . 135 . 136 . 137
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages, 25 years.  Men employés, tons produced, killed and injured, increase and decrease for 2:	. 132 . 134 . 135 . 136 . 137
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages, 25 years Men employés, tons produced, killed and injured, increase and decrease for 2 years.	. 132 . 134 . 135 . 136 . 137
Non-fatal accidents classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc. by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years  Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages. 25 years.  Men employés, tons produced, killed and injured, increase and decrease for 2: years.  PHYSICAL CHARACTER OF COAL MINES IN ILLINOIS, BY COUNTIES—	. 132 . 184 . 135 . 136 . 137
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years.  Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages, 25 years.  Men employés, tons produced, killed and injured, increase and decrease for 2 years.  PHYSICAL CHARACTER OF COAL MINES IN ILLINOIS, BY COUNTIES—Bond, Brown, Bureau.	. 132 . 134 . 135 . 136 . 137 5 . 138
Non-fatal accidents, classification of causes by districts.  Non-fatal accidents caused by explosions, falling coal, etc., by districts and fo seven years.  Non-fatal accidents caused by use of powder and other causes for seven years Non-fatal accidents by falling roof and sides, for 25 years.  Fatal and non-fatal accidents, falling roof and sides, with percentages, 25 years.  Men employés, tons produced, killed and injured, increase and decrease for 2: years. ### TWENTY-SIXTH ANNUAL REPORT

## Statistics of Coal in Illinois for the Year Ending June 30, 1907.

#### COAL IN ILLINOIS

This report constitutes the twenty-sixth annual presentation by this bureau of the coal mining industry of the State. The data concerning this great and growing industry comes to the bureau through the reports of the ten state inspctors of mines, and is obtained by them direct from every operator on uniform schedules specially prepared by the bureau. The record in every respect shows a remarkably prosperous year in this industry.

Following the form of the reports for the past several years the statistics of the coal mines of the State are shown in two classes, designated as shipping mines and local mines. A summary of the leading items gathered from the reports of the inspectors is here presented:

### SUMMARY FOR THE YEAR ENDED JUNE 30, 1907.

	55
Number of counties producing coal.  Number of mines and openings of all kinds	933
New mines or old mines reopened during the year.	88
Mines closed or abandoned since last report	173
Total output of all mines, in tons of 2,000 pounds 47.7	98,621
Number of shipping or commercial mines	411
Total output of shipping mines, tons	36,839
Number of mines in local trade only.	522
	61.782
	28.302
	99.509
	69.442
	25,306
Total tons of pea coal. 9.1	38.044
	38.018
Total tons shipped42.0	32,535
Tons supplied to locomotives at the mines. 1.1	00,706
	03,639
	61,741
Average days of active operation for shipping mines	209
Average days of active operation for all mines	184.1
	\$1,022
	\$0.973
	\$1.296
Average value per ton of egg coal at shipping mines	\$1.262
Average value per ton of nut coal at shipping mines	\$1.009
Average value per ton of pea or screenings coal at shipping mines	\$0.336
	\$0.336

Aggregate home value of total product	\$49 486 396
Average value per ton, all grades at the mines	\$1.037
Number of mines in which mining machines are used.	101
Number of mining machines in use	1,105
Number of tons undercut by machines.	14,490,454
Number of tons mined by hand	33,308,168
Average number of miners employed during the year	45,498
Average number of other employes underground	13,026
Average number of boys employed underground	1,595
Average number of employés above ground	6,595
Total number of employes.	66,714
Number of persons at work underground.	60.119
Number of men on surface	6,595
Average price paid per gross ton fer hand mining, shipping mines	\$0,592
Average price paid per gross ton for machine mining	\$0.4791
Number kegs of powder used for blasting coal	1.261.910
Number of kegs of powder used for other purposes	5,121
Number of pounds of dynamite	71,120
Number of men accidentally killed	165
Number killed inside of the mines.	
Number killed outside of the mines	7
Number of wives made widows	95
Number of children left fatherless.	273
Number of men injured so as to lose a month or more of time	636
Number of gross tons mined to each life lost	289,689
Number of employes to each life lost	404
Number of deaths per 1,000 employed	
Number of gross tons mined to each man injured.	74.802
Number of employes to each man injured	104
Number injured to 1000 employed.	9.6
	0.0

The number of counties reported this year as producing coal is fifty-five; this is one more county than reported last year. However, the number of mines is 85 less than the past year, but the output increased from 38,317,581 tons last year to 47,198,621 tons this year, the increase being 9,481,040 tons, or 24.7 per cent; this is the largest actual increase in tonnage recorded in the history of coal mining in the State.

The number of shipping mines has decreased from 419 last year to 411 for this year, a loss of eight. Altogether the decrease in this class of mines was 17, being four less in the first district; six in the second; four in the fifth and three in the sixth; however there was an increase of nine mines; two in the third district; five in the ninth and two in the tenth; the fourth, seventh and eighth districts have the same number as last year.

The number of persons employed in and around the mines increased 7.1 per cent; this increase was entirely at the shipping mines. At this class of mines the days of active operation was 209, an increase of 10 per cent over last year.

The marked increase shown in the tonnage or output of the mines, also of men employed and days of operation beckens an unusually

prosperous year for the coal mine workers of the State.

Machine mining shows a remarkable increase in the number of tons cut and mined by this method; the total tons undercut by machines was 14,490,454 an increase over last year of 4,927,224 tons or 51.5 per cent. This tonnage is over 30 per cent of the total tons produced, and is by a long ways the leading record for machine mining in the State.

The number of machines increased from 962 to 1,105 nearly 15 per

cent.

The use of powder in the mines is still on the increase; this year shows that 1,261,910 kegs, 25 pounds each, was consumed in blasting coal; this is an increase of 234,537 kegs or 22.83 per cent more than was used last year.

The fixed price for powder was \$1.75 per keg which is paid by the miners. This applied to the number of kegs used gives the enormous sum of \$2,208,343 paid from the wages of miners where powder is used for blasting down coal. Seventy per cent of this powder is used in the sixth, seventh, eighth, ninth and tenth districts.

There were 165 men killed in the mines during the year, and 636 were more or less seriously injured. The record last year was 155 killed and 480 injured; the number injured this year is greater than for

any year since 1896.

The ratio of accidents for the year was 2.5 killed, and 9.6 injured to each 1,000 persons employed.

### CLASSIFICATION OF MINES.

As heretofore noted the presentation of the statistics of the coal mines of the State in the classification of shipping and local mines is observed in all tables.

Table I is a condensed showing of mines, men and tons of all mines and of the two classes, by districts. For the state the number of mines decreased 8.4 per cent from last year; the number of men increased 7.1 per cent and the tonnage 24.7 per cent.

Table 1—Mines, Men and Tons, Shipping and Local Mines, by
Districts—1007.

DISTRICTS.	- 1	ALL MIN	ES.		SHIPPIN	īG.	LOCAL

Eighth	115	9,343	8, 145, 200	78	9, 053	7,991,535	37	290	153, 665
Ninth	67	7, 234	5, 582, 245	57	7, 181	5,563,602	10	53	18, 643
Tenth	100	9, 121	7, 775, 448	62	8,908	7, 698, 816	38	213	76,632
The State.	933	66, 714	47, 798, 621	411	63, 154	46, 436, 839	522	3,560	1, 361, 782

Table 2 shows the percentages of the whole number of mines, men and tons, represented in each district, also the percentages of the same divisions for the shipping and local mines.

The fourth district contains the largest number of mines 15.75 per cent, and the fifth the smallest number, 6.97 per cent. The eighth district produced the largest proportion of coal, 17.04 per cent also em-

ployed the largest number of men, 14.01 per cent; the tenth district follows closely with 13.67 per cent of men employed and 16.27 per cent of the output.

For shipping mines the ninth district leads all the other districts; 85.07 per cent of the mines in this district are of the shipping class, employing 90.27 per cent of the men and producing 90.67 per cent of

its tonnage.

The shipping mines in the sixth, seventh, eighth, ninth and tenth districts, comprising the western central and the southern coal field of the State, represent this year, 68 per cent of all mines of the shipping class, employing 63.7 per cent of the men and producing 72.4 per cent of the coal.

### INCREASE OR DECREASE.

Table 3 presents a comparative table, as to mines, men and tons, for the years 1906 and 1907, the showing is by districts and for all mines. The number of mines decreased 85 or 8.4 per cent from last year; in this respect only the seventh, ninth and tenth districts show an increase; the third and fourth districts represent 80 per cent of the decrease.

The first, second and sixth districts show a decrease in the number of men; all the other districts show an increase, the net increase being 4.431 or 7.1 per cent, all of the districts show an increase in tonnage;

the fifth increased 45.3 per cent; the tenth 44.2 per cent; the seventh 37.7 per cent; the ninth 35.1 per cent. The total increase in the product this year over last was 9,481,040 tons or 24.7 per cent.

### SHIPPING AND LOCAL MINES.

Table 4 shows all of the mines, men and tons for a series of 15 years with the percentages of increase during this period. The number of mines all classes, increased 18.4 per cent; men 88.5 per cent and tons 139.6 per cent. Shipping mines increased 32.6 per cent: men 119.8 per cent and tons 141.1 per cent.

<sup>\*</sup> Decrease.

Table 5 presents the number of mines, men and tons of all mines for the series of 15 years, with the percentages of each item represented in the two classes of mines. The percentages of the whole number of mines, men and tons in the shipping class is larger than for any year in the series.

Table 5—Mines, Men and Tons, with Percentages of Shipping and Local Mines for Fifteen Years.

### GROUPING OF MINES BY OUTPUT.

Table 6 presents a grouping of mines by districts; the showing is for the number of mines and tons, ranging in output from 1,000 tons to 200,000 tons and over.

TABLE 6—Grouping of Mines by Tonnage and Districts—1907.

Table 7 shows by districts the percentages of mines, men and tons arranged and classified as to tons of output. For the purpose of comparison the percentages for last year appear at the bottom of the table; the only increase shown over last year is in the group of mines producing over 100,000 tons, all of the mines in the other groups show a decrease in every item. Dividing the grouping into two classes, it is found that the mines producing less than 50,000 tons, comprise 71.5 per cent of the mines; 16.42 per cent of the men but only 10.13 per

cent of the tonnage. The mines having an output of 50,000 tons and over represent only 28.5 per cent of the mines, but employed 83.59 per cent of the men and produced 89.87 per cent of the total product.

Table 9 presents the grouping of mines by tonnage for a series of twenty-five years. The notable changes in the several groups are in the decrease in the number of mines producing less than 1,000 tons, and the large increase in the class producing 200,000 tons and over, this increase being 70 per cent.

Table 9—Number of Mines in Specified Groups of Tonnage for a Series of Twenty-five Years.

Table 10 shows, by percentages, the same grouping of mines for the series of 25 years. While the whole number of mines has increased only 46 per cent, the number producing 50,000 tons of coal and over has increased over 300 per cent. The bottom line of the table shows the percentage of the increase of mines in each group.

Table 11 presents by tonnage the same grouping of mines for a period of 16 years, 1892-1907, with the increase and decrease during the period. The three groups of mines producing under 1,000 tons to 50,000 show a decrease of 9.3 per cent. On the other hand, the mines producing 50,000 tons and over show an increase of 243 per cent. The increase of the product of all mines during the series of years was 20,036,345 tons, or 167.6 per cent.

### MINES OF LARGEST OUTPUT.

Table 13 presents a list of 95 individual mines which produced 100,000 tons and less than 200,000 during the year, with the name of the operator and the location of each mine. The total product of these mines was 13,376,164 tons, or 28 per cent of the total output. The average output of these mines was 140,802 tons.

Table 14 is a list of the individual mines, the product of each being 200,000 tons and over for the year. This table gives, in addition to the name of the operator and location of the mine, the days in operation, the depth of the mine, the thickness of the seam and the manner of mining the coal. The list embraces 80 mines, with a total output of 22,978,809 tons. Last year there were 47 mines in this classification with an output of 12,565,030 tons.

The increase of these mines this year over last is 33 in number of mines and 10,413,779 tons. The average number of days for the year was 227, which applied to the tonnage, gives an average

daily output of 1,265 tons for each mine.

Special attention is directed to the two mines, Nos. 1 and 2 of the Superior Coal Company, at the head of the list. No. 2 shows a record of 699,127 tons produced in 260 days, or an average of 2,689 tons for each day. No. 1 mine shows a total output of 658,173 tons hoisted in 255 days, or a daily average of 2,581 tons.

Both these mines combined produced 1,357,300 tons, being an

average of 2,636 tons for every day worked.

These mines stood at the head of the list of largest mines last year, with an average daily output at No. 1 mine of 2,154 tons and 2,062 tons at No. 2.

The output of these 80 mines is 48 per cent of the total output of

the State.

Table 15 gives the output of the large mines of the State for a series of twelve years and are shown in three classes. Combining the mines in all classes, it is found that the increase this year over last is 14.2 per cent in the number of mines and 33.6 per cent in the tonnage.

Table 15—Mines Producing 50,000 Tons and Less than 100,000—100,000 Tons and Less than 200,000, and 200,000 Tons and more for 12 Years.

#### NUMBER OF MINES.

Table 16 gives the number of mines in each district for last year, with number of new mines opened this year and the number abandoned.

The seventh, ninth and tenth districts show a total gain of ten mines; the other districts show a loss of 95, making a net loss of 85 mines from the number reported last year.

Table 16—Gain and Loss in Number of Mines—1906-1907.

Table 17 presents the record of opening new mines and the closing of old or abandoned mines for the past 18 years. The net gain during this period was 79 mines. The number of mines opened this year was less than for any of the past ten years and the number closed more than for any year during the same period.

Table 17—Total Number of Mines, the Number Opened and Closed; also the Gain and Loss for Eighteen Years.

#### SHIPPING MINES.

Table 19 shows the number of shipping mines in each district, with the gain and loss of these mines in the State for 12 years, also the

gain and loss by districts for the same period.

The gain in this class of mines during this time was 116, but during the same time 35 have been closed, leaving a net gain of 81 mines, as between this year and last. There was a gain of 2 mines in the third district, 5 in the ninth and 2 in the tenth, with a loss of 4 in the first district, 6 in the second, 4 in the fifth and 3 in the sixth, making a net loss of eight mines.

Table 20 presents the shipping mines by counties and districts, showing the number of mines, men and tons for the two years, 1906 and 1907, with the gain and loss for each item. As heretofore shown, there was a decrease of eight in the number of mines. However, the number of men increased 4,303 over last year and the output 9,314,028 tons.

Table 20—Shipping Mines—Number of Mines, Men and Tons by Counties and Districts, with the Gain or Loss, for the Years 1906 and 1907.

Table 21 presents a list of the shipping mines, giving the names of the operators, the number and location of the mines controlled by each, the total output of the mines and the distribution of the product.

The line at the top of the table shows the totals of each item. ()f the total output of these mines, 90.5 per cent was loaded on cars at the mine for shipment, 2.4 per cent went to locomotives at the mine chutes, 2.8 per cent was sold to the local trade and 4.3 per cent consumed or wasted at the mines.

1906	419	178	248	21	16	285
1907	411	180	261	9	6	276

This shows that the shipping mines of the State are operated by 276 owners. Of these, 94.6 per cent are corporations. This class of ownership of the mines of the State has increased 14.5 per cent in the four years represented.

Table 22 is a list of the 180 locations where these 411 shipping mines are operated. The counties where situated and the number of the district is also shown.

#### GRADED OUTPUT.

Table 23 gives, by districts, the several grades of coal for the year. The division is the same as shown in these reports for the past eight years. As in former years, lump coal is largely in excess of either of the other grades.

Table 23—Output of the Shipping and Local Mines of the State with Tons of the Different Grades of Coal, by Districts—1907.

	Total	Tons of the Different Grades of Coal.							
DISTRICTS.	output tons.	Mine run.	Lump.	Egg.	Nut.	Pea or scree'gs.	Slack or waste.

Table 24 shows the percentages of the different grades of coal produced by districts. The eighth district shows the largest percentage of the output of the State; the fifth district shows the largest proportion of mine run coal produced from its mines, while the second and first districts show comparatively much the largest tonnage of lump coal.

Table 24—Percentages of Total Output of the Different Grades of Coal, Shipping and Local Mines, by Districts.

	Per cent	PERCENTAGE OF THE DIFFERENT GRADES OF COAL.								
DISTRICTS.	of total output.	Mine run.	Lump.	Egg.	Nut.	Pea or scree'gs.	Slack o waste.

Ninth	11.98	29.01	32.89	9.03	6.32	20.95	1.80			
Tenth	16.58	24.05	28.30	8.17	14.77	19.35	5.36			
Shipping mines	100.00	24.32	42.41	5.32	5.60	19.49	2.86			
Local mines	100.00	24.70	66.54	.06	1.80	6.45	.45			

Table 25 shows the total output of all mines of the State and the different grades of coal for a series of eight years. The last part of the table shows the tons of the several grades reduced to percentages. The most notable variation in the percentages for the several years is that of the decrease in the tonnage of lump coal, being from 55.4 per cent in 1900 to 43.1 per cent this year.

Table 25—Total Output of the Different Grades of Coal, all Mines. for Eight Years with Percentages.

#### MINES. MEN AND TONS.

Table 26 shows the number of mines, men and tons of the State for the past 26 years. The last two columns of the table give the

percentages of lump and other grades of coal.

An examination of this table will show the marvelous growth of the coal industry in this State for the period covered by these statistics. During these years the number of mines has increased 32.5 per cent, the number of men employed 228.8 per cent and the tons of coal produced 333.9 per cent.

During the past nine years the tonnage has increased over 100

per cent.

Table 26—Output of the State for 26 Years and the Mines and Men Producing the Same.

Table 29 gives the percentages drawn from table 28 and presents the activity of mining operations for each month during the year.

The last line in the table gives the percentages by months for 1906. Very slight changes in the monthly output for the two years is to be noted. The highest per cent of output this year was reached in January; last year it was reached in March.

Table 30 shows by districts and for the State the tons of coal mined for two periods of the year, from July 1 to December 31 and

from January 1 to June 30.

Each period of the fiscal year has a portion of what is usually termed the dull season in the mining industry; the first period, the months of July, August and September; the second period, the months of April, May and June. However, it is shown here that the two periods differ only 1.6 per cent in favor of the second period.

#### HAULAGE IN THE MINES.

Table 31 presents by districts the manner of hauling coal in the shipping mines. Three of the mines failed to make report on this item. Of the 408 mines from which reports were received, 75, or 18.4 per cent, employed 129 motors and hauled 39.9 per cent of the coal; 25, or 6.1 per cent, had cable haulage, bringing out 6.2 per cent of the coal; 303, or 74.3 per cent of the mines held to the use of mule haulage, moving 57.8 per cent of the output; while 5, or 1.2 per cent of the mines, moving only one-tenth of 1 per cent of the product, impelled the cars by hand.

NOTE—One mine in the Sixth district, 105,355 tons, not reported. Two mines in the Tenth district, 178,270 tons, not reported.

\*One gasoline.

<sup>†</sup>One condensed air.

Table 32 presents a list of the mines in which motor haulage is employed, giving the name and number of motors in use, the kind of power employed and the number of tons hauled. Of the 75 mines, 32, or 42.7 per cent, have two or more motors in use. The largest number in use at any one mine is 12, at the Zeigler Coal Company's mine, at Zeigler. The following are the different kinds of motors in use: General Electric, 3; Goodman, 58; Goodman third rail, 11; Jeffrey, 27; Morgan-Gardner, 9; Morgan third rail, 3; Porter, 1; Westinghouse, 17.

COUNTIES OF

Table 33 presents a list of counties for a series of ten years. These during this time. Williamson county is first in rank this year, with Sangamon county is second in rank this year and was the same last seven of the years shown in the table. During these years the counthe output 29,311,604 tons, or 206.5 per cent.

### DISPOSITION OF THE OUTPUT.

Table 35 gives the total output of coal by districts and the disposition of the same.

Table 35—Disposition of the Output of Shipping Mines, by Distrets, also Local Mines.

			Disposition of Product-Tons.					
DISTRICTS	Number of mines.	Total output all grades— Tons.	Shipped from mines.	from locomotives		Consumed and wasted at mines.		
First	30	2, 979, 910	2, 578, 858	113, 121	144,713	143, 218		
Second	16	2, 415, 920	2, 256, 765	27, 405	47, 990	83, 760		
Third	31	2, 043, 203	1, 836, 370	83,602	61, 528	61,703		
Fourth	33	2, 296, 063	2,062,944	67, 432	102, 132	63, 555		
Fifth	22	3, 096, 833	2, 777, 154	38, 794	170,551	90, 334		
Sixth	46	5, 693, 211	5, 055, 888	116, 212	276, 468	204, 643		
Seventh	36	6, 657, 746	6, 034, 648	185, 992	165, 339	271,767		
Eighth	78	7, 991, 535	7, 543, 606	61, 940	129, 298	256,691		
Ninth	57	5, 563, 602	4, 845, 735	299, 453	145, 688	272, 726		
Tenth	62	7, 698, 816	6, 980, 567	106, 755	77, 241	534, 253		
Shipping mines	411	46, 436, 839	42, 032, 535	1, 100, 706	1,320,948	1,982,650		
Local mines	522	1, 361, 782			1, 182, 691	179,091		
The State	933	47, 768, 621	42, 032, 535	1, 100, 706	2, 503, 639	2, 161, 741		

Table 36 shows the disposition of the output reduced to percentages. All of the districts increased in tonnage shipped from the mines.

Table 36—Percentages of the Output of Shipping and Local Mines, also Percentages of the Distribution, by Districts—1907.

			PERCE	NTAGES OF	Tons-	
DISTRICTS.	Number of mines.	Total output.	Shipped.	To locomotives.	Sold to local trade.	Consumed or wasted at mines.
First	. 30	6.42	86.54	3.80	4.86	4.8
Second	. 16	5.20	93.41	1.13	1.99	3.4
Third	. 31	4.40	89.88	4.09	3.01	3.0
Fourth	33	4.94	89.85	2.94	4.45	2.7
Fifth	. 22	6.67	90.32	1.25	5.51	2.9

#### DISTRIBUTION OF COAL TO RAILROADS.

Table 39 is the tenth presentation of the tonnage of the shipping mines of the State, as distributed and handled by the railroads for

transportation to the markets.

There are 37 railroads reported this year as carrying the 42.032.535 tons of coal from the mines to the different markets. The Illinois Central has headed this list every year, traversing more of the coal producing counties and hauling a larger tonnage than any other road. For this year this road took coal from 22, or 40 per cent of the counties, 27.7 per cent of the shipping mines, and hauled nearly 20 per cent of the total tons shipped. The Chicago & Eastern Illinois road stands second in quantity of coal hauled, displacing the Wabash road, which had second place last year.

Table 39—Railroads which have Transported the Coal Produced by the Shipping Mines of the State, also the Counties Contributing the Tonnage to Each Road—1907.

Table 40 is a list of the 37 railroads receiving the coal of shipping mines for transportation. Forty-three roads were represented in the list last year. Eleven of these roads each hauled over one million of tons, the aggregate being 30,853,981 tons, or 73.4 per cent, of all the coal shipped from the mines.

Table 41 presents a list of 43 counties from which coal was shipped during the year. They are arranged according to the largest tonnage delivered to each railroad for shipment, with the per cent of tonnage shipped on each road. Williamson county takes first place in the list. It was third last year. St. Clair county was first last year in the list, but goes to third place this year. Sangamon county holds second place, the same as last year. Vermilion county delivered the largest tonnage of any one county to any one road, being 2,230,028 tons, shipped on the Chicago & Eastern Illinois railroad. Williamson county is second in this respect, delivering 2,092,879 tons to the Illinois Central road.

Table 41—Counties which have produced the Commercial Coal of the State and the Tonnage delivered to the several Railroads in each for transportation.

	Total tons shipped—State			42, 032, 535	

Table 42 is a list of the 43 counties, showing the number of mines shipping and their total output of coal in each county, also the distribution of the tonnage. Sixteen of the counties containing mines of this class each sent over 1,000,000 tons of coal to the markets, the range being from 1,061,410 tons produced in Clinton county to 5,236,438 tons from Williamson county. In the aggregate these counties contain 74 per cent of the shipping mines, which produced for the year 84.8 per cent of the coal and shipped 86 per cent of the tons to the market.

#### DAYS OF ACTIVE OPERATION BY DISTRICTS.

Table 43 presents by districts the number of mines and men, also the average number of days the mines were in operation. Referring to the shipping mines, it is shown that they were in operation an average of 209 days during the year and directly benefiting 95 per cent of all employés in the coal mining industry of the State.

TABLE 43—Days of Active Operation by Districts.

DISTRICTS.	MINES, MEN AND AVERAGE WORKING DAYS.									
	ALL MINES.			SHIPPING MINES.			LOCAL MINES.			
	Mines.	Men.	Days.	Mines.	Men.	Days.	Mines.	Men.	Days.

Table 45 shows by districts and for the State the average values mine run coal per ton for the State was 97.3 eents. This is one district shows a value of \$1.567 per ton. This is 4 cents more than 87.3 cents a ton in the eighth district, a difference of 69.4 cents. For district to \$1.075 in the eighth, a difference of 62.7 cents.

Table 47 shows for a series of 26 years the tonnage of lump coal, with the value per ton at the mines. This is the sixth year this grade of coal has been reported separately for shipping mines. The tonnage for this year is three and a half million tons more than last year and the largest tonnage of this grade ever reported. This is accounted for by the large increase in the total output.

### MINE EMPLOYES.

Table 49 shows a classification of all employés in the mines of the State, as to location of employment. The total number employed in all mines was 66,714. This number is an increase of 7 per cent over last year. Of the whole number employed, 90 per cent work under ground.

### PRICES PAID FOR MINING.

Table 52 shows by districts the tons mined by hand and by machine, with the average prices paid for mining. The total output of shipping mines mined by hand was 31,954,488 tons at a level rate for the State of 59.2 cents per ton. This is a trifle over 2 cents per ton more than last year. The output of shipping mines mined by machines was 14,490,454 tons, at a flat rate of 47.9 cents per ton. This is 3.7 cents a ton more than last year. Of the total output of shipping mines, 68.8 per cent was mined by hand and 31.2 per cent was mined by machines.

#### EARNINGS OF MINERS.

Table 54 presents the earnings of miners only in shipping mines where coal is mined exclusively by hand and paid for by the ton. The average days and the average rate paid per ton are both computed from the returns of each mine and shown in previous tables.

Table 54—Earnings of Coal Miners, Hand Mining, in Shipping Mines for the Year Ending June 30, 1907, by Districts.

Table 55 gives the record by districts of the coal mined by machines. No machines are used in the first, second and fourth districts. The mines in the seventh, eighth and tenth districts reported 86 per cent of the coal mined exclusively by machines and 81 per cent of the total machine mined coal.

Table 55—Machine Mining—Mines, Men, Machines, Tons, by Districts—1907.

Table 56 shows the record of machine mining for a series of eight years. The mines reporting the exclusive use of machines increased only 5 per cent over last year and the number of machines used only 9 per cent, while the tons mined increased 36.6 per cent. The total number of mines using machines increased 18.8 per cent over last year; the number of machines 14.9 per cent and the number of tons cut 51.5 per cent, showing certainly a remarkable increase in the effectiveness of machine mining.

Table 57 gives the kind of machines and the number in use, by districts. The Sullivan machine holds first place as to the number in use and the Ingersoll-Sergeant takes second place, putting the Harrison third in this respect.

Table 57—Name and Number of Mining Machines in Usc. by Districts—1907.

Table 58 presents the record of mining machines in use in the coal mines of the State for a series of eight years. The number of machines in use this year was 1,105. This is 143 more machines than reported for last year. Several of the different kinds of machines have largely increased in the number in use during the past few years.

Table 58—Name and Number of Mining Machines in Use for Eight Years.

Table 59 presents a list of 60 mines in which machines are used exclusively for mining coal. This is three more mines than reported for last year. The number of machines in use in these mines was 748, cutting a total of 10,434,573 tons of coal. This is 2,796,037 tons, or 36.6 per cent, more than was cut last year. The two mines of the Superior Coal Company at Gillespie, Macoupin county, head the list with an output of 1,357,300 tons, using 80 machines. These mines were in operation an average of 258 days during the year. This would make an average of 66 tons per day cut by each machine.

The Mt. Olive and Staunton Coal Company at Staunton, Madison county, shows a record of 510,052 tons cut by 11 machines. This mine is reported as being in operation 233 days. This gives an average of 2.189 tons for each day and 199 tons daily for each machine.

Table 60 is a list of machines operated in mines, where they are used exclusively for mining coal. Six of the machines were used separately in 44 of the 60 mines and produced 6,376,351 tons of coal, or 61 per cent, of all the coal thus mined.

### POWDER USED IN MINES.

Table 62 presents for the year the record by districts of all mines, both shipping and local, where powder is used for blasting down coal, and in addition the same record is shown for the State for the past seven years. In this table all employés are included. The total number of kegs of powder consumed during the year for blasting coal was 1,261,910. This was 234,537 kegs, or 22.83 per cent, more than was used last year and 157.2 per cent more than was used in 1900, eight years ago.

The total cost for this extremely large quantity of powder was

\$2,208,343.

TABLE 62—Distribution of Powder Used in all Mines, by Districts.

Table 63 presents by districts the distribution of powder in shipping mines only, without regard to the method of mining the coal. The computation shown as to the number of kegs per man and the number of tons per keg is based on the number of miners proper, as reported by each mine.

TABLE 63—Distribution of Powder in all Shipping Mines, by Districts.

Districts.	Number of mines.	Number of miners.	Total number of tons.	Number of kegs of powder.	Number of kegs per man.	Number of tons per keg.

Tables 64, 65 and 66 present the record by districts as to the use of powder for reducing the coal in the shipping mines of the State, under three different processes of mining.

Table 64 shows the results in mines where hand mining prevails

exclusively.

Table 65 is the same, but for machine mining exclusively, and table 66 is mines where both hand and machine mining are applied. The outcome reached by the different methods in the use of powder is shown by percentages as follows:

Table 64—Consumption of Powder in Shipping Mines, Hand Mining Exclusively, by Districts.

### BLASTING DOWN COAL IN THE MINES.

Table 68 shows by districts the methods employed in shipping mines where powder is used for blasting down coal. There are three classes of mines shown in the table; mines where the coal is blasted from the solid, mines where the coal is undercut before blasting and mines where both of the former methods are used.

It is here shown that in 70.9 per cent of these mines coal was blasted from the solid, producing 57.3 per cent of the tonnage; in 19.6 per cent of the mines the coal was undercut before blasting, producing 31 per cent of the tonnage, while in 9.5 per cent of the mines both of these methods prevailed, producing 11.7 per cent of the tonnage.

#### FATAL ACCIDENTS.

Table 75 presents by districts the record of the number of deaths occuring to employes in and around the coal mines of the State during the past year; also showing their relation to the number of men employed and the number of tons of coal produced. The number killed was 165. This is ten more than was reported for last year.

Table 75—Fatal Casualties by Districts of the Year Ended June 30, 1907.

Table 76 gives the record of the fatalities in the coal mines of the State for a series of 25 years. The ratio of the number killed to the number employed is the same as last year, while the number of tons produced to each death exceeds that of last year by more than 40,000.

TABLE 76—Fatal Accidents for Twenty-five Years.

Year.	Number killed.	Total number of employés.	Total tons of coal mined.	Number of employés to each life lost.	Rate per 1,000.	Number of tons of coal produced to each life lost.

Table 78 presents by districts a list of 22 causes from which deaths occurred during the year. The seventh, eighth, ninth and tenth districts account for 94, or 57 per cent, of all the deaths. The leading causes in these districts resulting fatally were: Falling coal and slate, pit cars, cages and explosions of powder and gas. The whole number of deaths from these causes was 96. Of these, 68, or 71 per cent, occurred in the districts named. However, these districts produced for the year 59 per cent of the coal, which was 300,231 tons to each death, and in this respect exceeding the average for the State.

Table 79 presents the fatal accidents in the coal mines of the State for 20 years. In this showing the numerous causes from which death resulted have been reduced to seven of the chief sources of fatalities in mines. Falling coal and rock has been the most prominent cause for all the years shown in the table, with the exception of the years 1903, 4 and 5. Over 50 per cent of all the deaths was from these causes. The exceptional years were noted for the large number of deaths from the use of powder.

Table 80 shows by districts and for seven years the causes of fatal accidents reduced to three classes, all deaths resulting from the use of powder, falling coal, rock, etc., and from miscellaneous causes. The number killed this year from the use of powder and from falling coal, rock, etc. is the same as last year. It is quite remarkable that only one man was reported killed by flying coal. Considering the large quantity of powder used in the past few years in reducing the coal and the very large production by this process, it is notable that for the past seven years only 24.8 per cent of the deaths resulted from the use of powder in mining, while 48.9 per cent was from falls in the mines and 26.3 per cent from all other causes.

Table 82 shows in three classes the use of powder, falling coal, etc., and all other causes, both fatal and non-fatal accidents for the year, separately and combined, resulting from the use of powder; also both classes of accidents caused by falling coal, etc., and all other causes with percentages. There were 74 accidents in all resulting from the use of powder; 24, or 32.4 per cent were fatal and 50, or 67.6 per cent non-fatal.

Both fatal and non-fatal accidents from falling coal, etc., number 411. Of these, 84, or 20.4 per cent were fatal and 327, or 79.6 per cent non-fatal. The number included in all other causes was 316, of this number; 57, or 18 per cent were fatal and 259, or 82 per cent non-fatal. The total number of accidents, both fatal and non-fatal, was 801; fatal, 165, or 20.6 per cent; non-fatal, 636, or 79.4 per cent.

Table 84 gives the occupations and the per cent in each, also the conjugal relationship of the men killed. Fifty-two per cent of the killed were miners; these with drivers, laborers and shot firers comprise 79 per cent of the whole number. Of the conjugal relationship, 95, or 57.6 per cent were married men and 70, or 42.4 per cent unmarried; 95 wives were made widows and 312 children were left fatherless.

Table 85 shows the number of persons killed at coal mines in 20 states and countries for a series of ten years, 1897-1906. This table is taken from the "Engineering and Mining Journal," New York, published in December, 1907, and as prepared by Frederick L. Hoffman. Table 86 reduces the number killed to every 1,000 persons employed. These tables have been reproduced in the coal reports of this bureau from the same source for several years.

### Non-Fatal Accidents.

Table 87 presents by districts the non-fatal casualties in the coal mines of the State for the year. The number injured, so as to lose thirty or more days' time, was 636. This is 156, or 32.5 per cent, more than last year. By districts the number of tons mined to each man injured ranges from 24,512 tons in the second district to 279,112 tons in the ninth and 75,155 tons for the State.

Table 87—Non-Fatal Accidents by Districts—1907.

Table 88 presents the same information for a series of 25 years. The number of men injured this year is greater than for any previous year since 1896. However, with the exception of the years 1903 and 1906, the number of tons produced this year to one man injured is greater than for any of the other years shown.

Table 88—Non-Fatal Accidents for Twenty-five Years.

# CONJUGAL RELATIONSHIP OF THE INJURED AND TIME LOST

Table 90 shows by districts the conjugal relations of the injured, also the days lost time incident thereto. The time lost, as here computed, averages 54.7 days. This, however, is for 535 men; leaving 101 men, some of whom were not reported, others had not recovered and still others had removed to other localities and the lost time could not be ascertained. Of the whole number, 56.8 per cent, were married and 43.2 per cent single.

The dependents numbered 1,158, of whom 823 were children, with a loss of employment to the injured of over two months' working time, and with contingent expenses and cost of living; also much privation and want consequently ensuing to many of these families.

Table 90—Non-Fatal Accidents, Conjugal Relations of the Injured, Dependents, Time Lost—by Districts.

Districts.	Total injured.	Married.	Single.	Children.	Dependents.	Number recov- ered and losing time.	Total days lost.	Average days lost.

The State	636	361	275	823	1, 158	535	29, 279	54.7

Table 91 presents in detail by districts a list of 41 causes bringing about the injuries sustained. Only one man was injured from each of 20 of the causes. Falling coal etc., in the mines accounts for 51.4 per cent of these accidents and pit cars for 26.9 per cent, making 78.3 per cent from the two causes.

Table 92 presents the non-fatal accidents reduced to three classes of causes: From the use of powder, falling coal, etc., and miscellaneous. This table conforms in every respect to table 80 of fatal accidents and the same record is shown for the six previous years. Here is shown that only 50, or 7.9 per cent, of the non-fatal accidents were traced to the use of powder, while 327, or 51.4 per cent were caused by falling coal, etc., and 259, or 40.7 per cent, from various other causes.

Table 92—Non-Fatal Accidents Caused Primarily by Explosions, Falling Coal, Rocks, etc., and by Other Causes, by Districts, for the Year 1907, and for the Six Preceding Years.

Two gas explosions.

Thirty-two gas explosions: three fire damp: two gasoline explosions; one dynamite.

Table 93 presents the percentages of the numbers shown in table 92. The non-fatal accidents for the past seven years number 3,396. Of this number 288, or 8.5 per cent, resulted from the use of powder; 1,708, or 50.3 per cent, came from falling coal, etc., in the mines and 1,400, or 41.2 per cent from the various other causes.

Table 94 presents the non-fatal accidents caused by falling roof and sides and from all other causes for 25 years. The two last columns of the table give the percentages for each year. With the exception of the two years, 1902-3, falls in the mines was the leading cause of all this class of accidents. For the 25 years, 56.6 per cent was from this cause and 43.4 per cent from all other causes.

## Reports

of the

# State Inspectors

of Mines.

### FIRST INSPECTION DISTRICT-1907.

SECOND ANNUAL REPORT.

Counties-Grundy, Kankakee, LaSalle, Will.

HECTOR McCallister, Inspector, Streator.

Hon. David Ross, Secretary State Bureau of Labor Statistics, Springfield, Ill .:

SIR—In compliance with section 12 an an Act of the General Assembly of the State of Illinois, defining the duties of the State inspectors of coal mines and providing for the health and safety of persons employed therein, I herewith submit the second annual report of coal mines in the

First Inspection District for the year ending June 30, 1907.

The district includes the coal producing counties of Grundy, Kankakee, LaSalle and Will. The report contains tabulated statements showing the number of mines in operation, both shipping and local; the depth of the shafts and the thickness and geological number of the different seams; the number of new and abandoned mines; the number of persons employed at each mine; the tons of lump and other grades of coal produced; the price per ton paid for mining; the value of lump and other grades of coal per ton at the mine and the aggregate value of the total product; the number of kegs of powder and the number of pounds of dynamite consumed; the casualties in and around the mines, both fatal and non-fatal; the number of wives made widows and the children left fatherless, caused by fatal accidents; also the number of days of active operation of every mine in the district.

The following is a summary for all the counties in the district:

Total number of mines	67
Number of shipping mines	30
Number of local mines	37
Number of new mines	3
Number of abandoned mines	8
Number of miners	4.922
Number of others under ground.	1.201
Number of boys under ground.	178
Number of employés above ground	649
Total number of employes	6.950
Total tons of coal produced—all grades.	3.198.049
Total tons of mine run	185.148
	2.097.217
Total tons of lump	175.743
Total tons of egg	39.502
Total tons of nut	631.310
Total tons of screenings	
Total tons of slack burned and wasted	69.129
Average value per ton of mine run at the mine	\$1.567
Average value per ton of lump	\$1.702
Average value per ton of egg	\$1.808
Average value per ton of nut	\$1.54
Average value per ton of screenings	\$0.612
Average value per ton of slack or waste.	\$0.667

Tons of coal mined to each fatal accident	
Tons of coal mined to each non-fatal accident	31,984
Number of employes to each fatal accident	386
Number of employes to each non-fatal accident	70

The following statement gives the coal production by counties in the first district, with the increase in each for the years ending June 30, 1906-1907:

COUNTIES.	TOTAL OUTP	TOTAL OUTPUT IN TONS.						
COUNTIES.	1906.	1907.	Increase.					
Grundy	1, 170, 625	1, 327, 197	156, 57 <b>2</b>					
Kankakee	28, 419	37,828	9, 409					
LaSalle	1, 595, 327	1, 644, 686	49, 359					
Will	141, 959	188, 338	46, 379					
Total	2, 936, 330	3, 198, 049	261, 719					
Net increase		261,719						

All the counties in the district show an increase in the output over last year.

### NEW MINES.

In LaSalle county, LaSalle County Carbon Coal Company has opened a new mine No. 5 at Cedar Point. The Kickapoo Coal Company has sunk a new shaft near Seneca. Oscar Kimes has sunk a new shaft one mile west of Streator and Jerry Pratt has opened a new mine at Lowell. The LaSalle County Carbon Coal Company's No. 5 mine, located at Cedar Point, went into active operation August 19, 1907. The coal is now hoisted out of the air shaft. The hoisting shaft is 12 by 16 feet in the clear and is equipped with steel tipple and all necessary machinery for handling cars tandem on the cage. The cars are operated by steam pushers, with transfer tables for placing empties in front of pushers; also cross over dumps and kick backs, according to the best modern ideas.

The cages are equipped with the Ottumwa safety catches, which project into the timbers at the side of the shaft, in case of the breaking of the rope. The rope is connected to the cages with Humble safety detaching hook, designed to hold the cages in position near the pulley in case of overwinding. The company also installed elaborate shaker screens and box

car loaders.

The hoisting apparatus was furnished by the Litchfield Foundry and Machine Company and consists of 24 by 42 inch double engines with a seven foot drum, steam brake. The boiler house contains five tubular boilers, 72 inches by 18 feet. The boiler and engine houses are built entirely fire proof. The air shaft is located 265 feet from the main shaft and will be equipped with a 6 by 16 foot fan, operated by an 18 by 20 inch engine. The sengine house will be brick and have connetions with air shaft of concrete. The air shaft will be equipped with a hoisting apparatus for a single cage,

to be used in letting down material and doing necessary repair work in the air shaft. The escape ways consist of stairways in a separate compartment. The plans, taken as a whole, contemplate an absolutely fire proof outfit, and no expense has been spared to secure the most perfect and safest arrangement of machinery and other devices providing for safety in the handling of men and material.

#### ABANDONED MINES.

The following mines have been abandoned in LaSalle county: William McMillen, Streator; Joseph Sowerby & Co., Streator; William G. Francis, Streator; Mathew White, Ottawa; also the North Wilmington Coal Company, at Seneca; and in Grundy county the Wilmington Coal Mining and Manufacturing Company's No. 4 mine at Diamond and Max Davidson & Son's mine near Morris. The Rixson Coal Company of Braceville, Will county, has not been in operation since the strike in 1906, but intend to open the mine again this fall.

### PROSPECTIVE MINES.

In LaSalle county the Streator Fuel Company of Streator is sinking a new shaft about three and one-half miles northeast of the town. Harrison & Co. are taking the water out of the old mine formerly operated by the Joliet and Streator Coal Company, which was abandoned eighteen years ago. The mine is located on the C. & A. Railway, a half mile east of Streator. The Chicago-Wilmington and Vermilion Coal Company is preparing to sink a new shaft one-half mile north of the corporate limits of Streator. The Chicago-Wilmington and Vermilion Coal Company is also sinking a new mine a half mile south of its No. 1 mine at South Wilmington, Grundy county.

#### FIRES AT MINES.

The night of August 13, 1906, the tower, engine house, boiler room and fan house of the LaSalle County Carbon Coal Company's LaSalle mine were destroyed by fire. The fire also extended down the hoisting shaft about twenty feet, so that it had to be retimbered. The fire was discovered by the night watchman in the fan house. How it originated no one knows.

A new tower has been erected, also a new brick engine house and boiler room have been built. The fan house has been built about seventy feet from the air chamber and made fire proof. The fan is 6 by 16 feet. A new shaker screen has been put in. The company has also put in an endless chain, to take the pit cars from the shaft to the railroad chutes, a distance of about 200 feet. The repairing of the mine was completed and put in operation November 12, 1906.

The night of September 26, 1906, a fire destroyed the tower, railroad chutes, engine house, boiler room and all outside buildings of Mrs. E. Hakes' mine at Rutland, LaSalle county. There were seven men in the mine at the time. After extinguishing the burning timbers at the bottom of the shaft, the men all got out safely by way of the escape shaft. A new tower has been erected, railroad chutes, engine house and boiler room have been rebuilt and work was resumed December 1, 1906.

#### IMPROVEMENTS.

The Oglesby Coal Company has built a new tipple a short distance southwest of the hoisting shaft on a branch of the C., M. & St. P. Railway. The pit cars are taken from the upper landing and conveyed by an endless chain about seventy-five feet to the new tipple, where the coal is loaded into the railroad cars. The company has also put in a new shaker screen and box car loader. This gives an outlet of its coal on two roads, the Illinois Central and Chicago, Milwaukee & St. Paul.

#### FATAL ACCIDENTS.

August 24, 1906, John Minmek, miner ,aged 64 years, marriad, was killed instantly by falling rock at the face of his working place in the Acme Coal Company's mine, Streator, LaSalle county. He leaves a widow and two children.

August 26, 1906, Louis Phillips, roadman, aged 48 years, married, was severely crushed by falling rock on the main west entry, 450 feet from the working face, in the C. W. & V. Coal Company's No. 2 mine, South Wilmington, Grundy county. Deceased and his son were working nights, cleaning the haulage road, when a rock fell from the roof striking deceased on the head. He was conveyed to his home, where he died three hours after the accident. He leaves a widow and eight children.

September 15 1906, Robert Hufford, miner, aged 31 years, single, was fatally injured by falling rock on the northwest cross road, about 100 feet from his working place, in the Joliet-Wilmington Coal Company's No. 2 mine, Braidwood, Will county. Deceased had quit work for the day at 3:30 p. m. and was on his way to the bottom, when a stone fell from the roof striking him or he head, knocking him against the side of the roadway.

breaking his neck. He died one hour after the accident.

September 17, 1906, Joseph Prazek, miner, aged 34 years, married, was instantly killed by falling rock at the face of his working room in the Big Four-Wilmington Coal Company's No. 6 mine, Carbon Hill, Grundy county. He leaves a widow and four children.

September 19, 1906, Thomas R. Williams, miner, aged 50 years, married, was fatally injured by falling rock on his road head in the Braceville Coal Company's No. 6 mine, Braceville, Grundy county. He died two hours after

the accident, leaving a widow and four children.

October 10, 1906, John Ginzzetti, miner, aged 22 years, single, was killed instantly at the face of his working room by a falling rock in the Chicago-Wilmington and Vermilion Coal Company's No. 1 mine, South Wilmington, Grundy county.

October 12, 1906, John Holmes, miner, aged 24 years, married, was killed instantly by falling rock at the face of his working room in the Acme Coal Company's mine, Streator, LaSalle county. He leaves a widow and one

child.

October 13, 1906, Leon Burney, miner, aged 23 years, single, was instantly killed by falling rock on his road head in the Oglesby Coal Company's mine,

Oglesby, LaSalle county.

November 3, 1906, John Kurasotte, driver, aged 18 years, single, was fataly injured in the No. 6 mine of the Big Four Wilmington Coal Company, Carbon Hill, Grundy county. Deceased was attempting to hold a loaded car on the down grade when his foot caught against a tie, causing him to fall in front of the car, which passed over his body. He died the following day.

November 9, 1906, John Arthur, miner, aged 36 years, married, was killed instantly by falling coal at the face of his working room in the mine of William Wood near Morris, Grundy county. He leaves a widow and five

children.

December 5, 1906, Emerson Featherstone, miner, aged 53 years, was killed instantly by falling rock in the mine of Matthiesen & Hegeler Zinc Company. LaSalle, LaSalle county. Deceased and his partner were loading a car about thirty feet from the face, when a rock fell on him, with the result as

stated. He leaves a widow and eight children.

December 18, 1906, Frank Lohmar, miner, aged 34 years, married, was killed instantly by falling rock at the face of his working place in mine No. 7 of the Wilmington Star Mining Company, Coal City, Grundy county. Deceased and his partner fired a shot at quitting time the day previous which knocked out all the props on the left hand side of their room. The next morning, instead of replacing the props, Lohmar commenced throwing out the loose coal, when a mass of rock fell on him, with the result as stated. He leaves a widow anad three children.

December 28, 1906, John Gartiglio, miner, aged 42 years, single, was killed instantly by falling rock at he face of his working room in the No. 5 mine of the Wilmington Star Mining Company's mine at Coal City, Grundy county.

January 15, 1907, Andres Jenco, miner, aged 40 years, married, was seriously injured by falling rock at the face of his working room in No. 6 mine of the Braceville Coal Company, Braceville, Grundy county. He was taken to the hospital in Joliet, where he died eighteen days after the accident. He leaves a widow and one child.

February 23, 1907, John Sheatock, miner, aged 32 years, married, was killed instantly by falling rock at the face of his work room in the Rockwell mine of the LaSalle County Carbon Coal Company, LaSalle, LaSalle county.

He leaves a widow and three children.

May 14, 1907, Eugene Lenzi, miner, aged 42 years, married, was severely burned by the explosion of powder in the No. 6 mine of the Braceville Coal Company, Braceville, Grundy county. Deceased was preparing to fire a shot and found his blasting barrel was clogged. After filing off a small piece of the barrel he inserted and lighted a squib, which failed to pass through the barrel. He then inserted a second squib and thought that it had passed through the barrel. After this preparation he commenced to fasten the barrel to the cartridge, when the powder ignited, burning him severely about the face and body. It is supposed that a spark was hanging fire in the barrel, which caused the powder to ignite. He was taken to the hospital in Joliet, where he died eight days after the accident. Deceased leaves a widow and five children.

May 22, 1907, John Kucera, miner, aged 47 years, married, was killed instantly by falling rock at the face of his working room in the No. 6 mine of the Wilmington Coal Mining and Manufacturing Company, Torino, Will

county. He leaves a widow and five children.

June 29, 1907, John Rosso, miner, aged 39 years, married, was killed instantly by falling coal, at the face of his working place in the No. 6 mine of the Big Four Wilmington Coal Co., Carbon Hill, Grundy county. Deceased leaves a widow and five children in France.

The county tables and recapitulations follow: Respectfully submitted,

State Inspector of Mines, First District, Streator, Illinois.

### SECOND INSPECTION DISTRICT-1907.

SECOND ANNUAL REPORT.

Counties-Bureau, Henry, Knox, Mercer, Rock Island, Warren.

THOMAS HUDSON, Inspector, Galva.

HON. DAVID ROSS,

Secretary, State Bureau of Labor Statistics, Springfield, Ill.

Sir—In compliance with section 12 of an Act of the General Assembly of Illinois, defining and setting forth the duties of State inspectors of coal mines, and providing for the safety and better preservation of the health and comfort of persons employed in the coal mines, I have the honor of submitting the Second Annual report of the coal mines located in the second inspection district as now formed, comprising the coal producing counties of Bureau, Henry, Knox, Mercer, Rock Island and Warren.

This is the second annual report submitted under the law of General Assembly of 1905, by which the State was redistricted, and the number of inspection districts and State inspectors of mines increased from seven to ten; and is the twenty-fourth annual report presented since the inception of the Mining law passed by the General Assembly of 1883, by which, the office of

State Inspectors of Coal Mines was created.

The tabular information in this report contains all the necessary information regarding the number of miners and other employés, underground and on the surface, engaged in the coal mining industry of the district; the number of mines of both classes, commercial and local; the vertical depth of the various shafts and slopes; the geological number and thickness of the various coal seams that are being worked in the district; the amount of powder consumed in blasting coal and other mining operations; the number of accidents, fatal and non-fatal, that have occurred during the year; the number of tons of coal of the various grades that have been produced, with the mining and selling price per ton for the same.

The averages, ratios and percentages are also given, in fact the information here shown will give a fairly comprehensive idea of the mining situation

as it exists in the second inspection district.

The following summary for the district is presented for the year ending June 30, 1907.

Number of shipping mines	16
Number of mines in local trade only	123
Total number of mines, all classes	139
Number of miners employed	4,241
Number of other employes underground	
Number of boys underground	121
Number employed on the surface	462
Total number of employés	5,837

Number of kegs of powder consumed, for all purposes	
Tons of mine run coal produced	
Tons of lump coal	
Tons of all other grades combined. 564,95	
Total product in tons of 2,000 pounds. 2,647,25	
Tons shipped on cars at the mines. 2.256.76	
Tons sold to local trade. 275,51	
Tons used for steam purposes at the mines. 87.56	
Tons supplied to locomotives at the mines	
Aggregate value of the total product. \$3,891,33	
Number of fatal accidents.	
Number of non-fatal accidents.	
Total number of accidents.	
Number of employés to each fatal accident	
Number of employes to each non-fatal accident.	
Number of employes to each non-ratar accident.	
Tons of coal produced to each fatal accident	
Tons of coal produced to each non-fatal accident.	
Tons of coal produced to each miner employed.	
Tons of coal produced to each employé, all classes	
Ratio of fatal accidents per 1,000 persons employed	38

### COMPARATIVE TABLE.

The following comparative table shows the product in tons in the different coal producing counties in the district for the years ending June 30, 1906 and 1907.

COUNTIES.	Total Prop Grades o Tons of		Increase.	Decrease.
	1906	1907		
Bureau	1, 547, 456	1, 891, 900	344, 444	
Henry	162, 429	173,587	11, 158	
Knox	62, 286	42,668		20, 618
Mercer	448,088	458, 472	10, 384	
Rock Island	74,021	66,513		7,508
Warren	16, 214	14, 110		2, 104
Totals	2, 311, 494	2, 647, 250	365, 986	30, 230
Net increase			335, 756	

The coal producing counties of Bureau, Henry and Mercer, show an increase over the year previous of 365,986 tons, and the counties of Knox, Rock Island and Warren a combined loss of 30,230 tons, leaving a net increase in the district over 1906 of 335,756 tons.

This increase is due entirely to the rapid development of the St. Paul Coal Co.'s Mine located at Cherry, Bureau county; the output for the year being 348,941 tons.

### NEW MINES.

One mine only of the shipping class, has gone into operation during the year; the Kewanee Coal Co.'s shaft No. 2 located at Kewanee. Henry county which began active operation about March 1, 1907. The surface equipment of this mine is excellent; the shaft tower is constructed of steel; the machinery consists of Litchfield winding engines, direct acting, or first motion, cylinders 18 inches in diameter by 32 inches stroke; winding drum 6 feet in diameter, a 12-foot ventilating fan, shaker screen; self dumping cages, etc., in fact the tower and machinery are by far the best and most complete that have been erected in Henry county.

The coal seam underground, however, is not so promising. It contains many clay slips, horse-backs and other irregularities, so common to seam

No. 6 of the Illinois geological section.

The Marquette Coal Company's mine, located at Marquette, Bureau county, the top works and shaft of which were destroyed by fire in December, 1905, have been thoroughly renewed. The shaft has been resunk and retimbered, a new tower erected and coal hoisting was again resumed in October, 1906.

#### MINES ABANDONED.

The mines of the shipping class that have been abandoned permanently or temporarily during the year are as follows: The Alden Coal Company's mine No. 4, located at Gilchrist, Mercer county, was worked out and abandoned November 4, 1906. The Atlas Coal Company's mine No. 2, located at Galva, Henry county, was worked out and abandoned May 11, 1907. The Etherley Coal Company's mine No. 3, located at Etherley, Knox county, ceased operations July 1, 1906, and has not been in operation since. This mine is not worked out, the company owning many acres of coal land in the vicinity. The cause of the closing of the mine is not generally known, and whether it will be reopened again or not is at present quite problematical.

whether it will be reopened again or not is at present quite problematical. In January, 1907, a sudden rise of the water in Camp creek flooded the old Ellis slope, and from the old workings thereof the water ran into the workings of the Coal Valley Mining Company's shaft No. 1, located at Cable, Mercer county. This put the mine out of action. After pumping night and day for a month the mine was practically cleared of water, but mining was not resumed. It is quite likely that operations will again be commenced in the fall of 1907 and continued until the spring of 1908, about which time the remaining coal will be exhausted and the mine worked out.

The following is a statement in detail of the fatal accidents that have occurred in the second inspection district during the year ended June 30,

1907:

July 30, 1906, August Commiant, miner, aged 45 years, married, was severely crushed through the body by falling coal at the face of his working room in the Spring Valley Coal Company's mine No. 4 at Seatonville, Bureau county. He died from the injuries March 27, 1907, nearly eight months after the accident. He leaves a widow and five children dependent.

September 26, 1906, Charles Daugherty, driver, aged 22 years, single, was killed instantly by being crushed under a trip of loaded pit cars in the Spring Valley Coal Company's mine No. 1 at Spring Valley, Bureau county. Deceased was driving a three mule team from an inside parting to the bottom of the shaft. He left the parting with a trip of nineteen loaded cars and had gone about 200 yards when by some means he fell in front of the trip and eight of the loaded cars passed over him. His body was found under the ninth car. He was alone at the time of the accident, and just

how he was thrown under the trip will probably never be known.

November 2, 1906, Anton Motto, driver, aged 32 years, single, had his leg severely crushed between an empty pit car and a cog, in the Marquette Coal Company's mine, located at Marquette, Bureau county. Deceased was going in with a trip of two empty cars. On coming to a switch he failed to guide the cars in the proper direction; therefore, the mule went straight along, the cars running into the switch. Motto jumped in front of the cars to stop them, but failed, and they were pulled off of the track against the cog, crushing his leg. He was removed to the hospital at LaSalle, where the leg was amputated, but he died of lockjaw November 14, twelve days after

the accident.

December 11, 1906, Gessani Ferdinado, company man, aged 29 years, married, working in No. 5 mine of the Spring Valley Coal Company at Dalzell, Bureau county, was found dead, sitting on a pit car loaded with coal to which a mule was attached. Deceased was engaged in brushing a roadway, working on the night shift. He took a mule into an entry to pull out a car of coal. Shortly afterwards he was found sitting on the car of coal,

dead, without any external marks to show the cause of his death. ever, at the inquest the surgeons testified that they had found that his neck was broken, but just how it had occurred could not be ascertained, the probability being that he was caught between the roof of the entry and top of

the loaded car. He leaves a widow and two children in Italy.

December 29, 1906, Anton Towrosa, miner, aged 29 years, single, was severely crushed through the abdomen by falling coal at the face of his working room in the Spring Valley Coal Company's mine No. 2, Spring Valley, Bureau county. Deceased was in the act of lying down, undermining the coal, when a large mass, that would weigh about 1,500 pounds, suddenly fell, crushing him through the abdomen, from the effects of which he died Neglect to properly sprag up the coal twenty-six hours after the accident. may be given as the cause of this accident.

January 31, 1907, Joseph W. Zeigler, miner and operator, aged 27 years, single, was killed instantly by falling roof at the face of his working room in Zeigler Bros.' local mine, about three miles from Coal Valley, Rock Island county. Deceased and his brother operated a local mine. They employed no help whatever, mining, hoisting and selling the coal themselves. This brother was at work in his room. He knew the roof was dangerous and had evidently, as he supposed, thoroughly secured the same by propping. A large slab, twelve feet long, three feet wide and an average thickness of fully three inches, suddenly fell, crushing him underneath. He was dead when found by his brother, about ten minutes after the roof fell.

February 7, 1907, Augusto Christofero, miner, aged 41 years, single, was severely crushed through the neck and breast by being caught between falling coal and a prop at the face of his working room in the Spring Valley Coal

Company's mine No. 4, Seatonville, Bureau county.

They had prepared a Deceased, with a partner, was working in a room. large break or fall of coal. Christofero had removed the sprags, but the coal did not fall. Just as he commenced to wedge it down the whole mass, about four tons, suddenly fell and he was caught between a standing prop and the falling coal, crushing him in such a manner that he died in thirty

minutes, or before he could be removed from the mine.

February 16, 1907, George Zinkis, miner, aged 50 years, married, had his leg broken and otherwise severely crushed by falling coal at the face of his working room in the Spring Valley Coal Company's mine No. 2, Spring Valley, Bureau county. Deceased, with a partner, was engaged in taking down coal and throwing it out to the roadhead. While so engaged a mass of coal, about half a ton, suddenly fell, breaking his leg and bruising him generally. His injuries were not considered serious at the time, but, according to the opinion of the attending physician, the shock to the system and a naturally weak heart combined caused his death four and one-half days after the accident. He leaves a widow, no children.

April 8, 1907, Ricardo Milani, miner, aged 41 years, married, was killed instantly by having his head crushed between loaded pit cars in the Illinois Third Vein Coal Company's mine No. 1, Ladd, Bureau county. This accident took place about 7:15 a.m., when the miners were leaving the shaft bottom to go to their working places. Deceased, in passing along between the full and empty tracks on the shaft parting, met a driver with a three-mule team and a trip of loaded cars coming out. Instead of getting on the empty track and out of the way, he got on the full track and was caught between the loaded trip of cars coming out and a trip of loaded cars standing on the

shaft parting. He leaves a widow and three children in Italy.

May 9, 1907, William C. Hoover, driver, aged 23 years, single, was severely crushed internally by being caught under a trip of loaded pit cars in the Empire Coal Company's mine No. 3, Gilchrist, Mercer county. Deceased was coming down a grade in the eleventh east entry with two loaded pit cars, riding on the front of the car and tail chain, a rather dangerous custom, By some means unknown, as no one was near him at the time, he fell in front of the rapidly moving cars. His light was extinguished. Another driver, following down the grade with three loaded cars, not knowing of

the accident, ran into the first trip, pushing the front car on top of the deceased. He was extricated as soon as possible and removed from the mine; medical aid was secured, but he died from the injuries three hours later.

May 17, 1907, Joseph Bardsley, driver, aged 23 years, single, was severely crushed internally by being thrown in front of a trip of moving loaded pit cars in the Coal Valley Mining Company's mine No. 2, Sherrard, Mercer county. This accident occurred at the parting on the main north entry. Deceased was having some trouble with the mule. He was driving a vicious animal. He had hold of the lines when suddenly the mule gave a lunge with sufficient force to throw Bardsley across from the empty to the full track, where he fell in front of a rapidly moving trip of two loaded cars. Before these cars could be stopped the front one ran on to him, crushing him internally. He died from the injuries about one hour after the accident.

Following are the usual tables and schedules for each county in the

Second Inspection district. Respectfully submitted,

THOMAS HUDSON,

State Inspector of Mines, Second District, Galva, Ill.

#### THIRD INSPECTION DISTRICT—1907.

SECOND ANNUAL REPORT.

Counties-Livingston, Marshall, Peoria, Putnam, Stark, Woodford.

JAMES TAYLOR, Inspector, Peoria.

HON. DAVID ROSS.

Secretary, State Bureau of Labor Statistics, Springfield, Ill.

Sir—Conforming to the provisions of section 12 of an Act of the General Assembly defining the duties of the State Inspectors of Mines, requiring each to prepare and forward to you, at the close of the official year, June 30, a report on blanks furnished, I herewith submit such report for the year ending June 30, 1907.

The tables contain the information called for, showing the number of coal producing counties in the district; the number of mines operated, both commercial and those serving the local trade, the names of all operators with the location of the mines; the number of mines and other employés in and around the mines; the number of kegs of powder used for blasting coal and for other purposes; the total number of tons of coal produced with the tons of each of the several grades; the tons shipped from the mines, and the tons disposed of otherwise; the value per ton of each grade of coal at the mine, also the aggregate value of the total product; the number of fatal and non-fatal accidents, with the nature and cause of each; the prices paid for mining and the output of every mine of each month during the fiscal year.

The following summary presents in a condensed form the principal items drawn from the several tables:

Number of counties producing coal	6
Number of mines	89
Number of shipping mines	31
Number of local mines.	. 58
Number of abandoned mines	48
Total number of employés	3,957
Number of miners	2,899
Number of other employés underground	617
Number of boys underground	76
Number of employes above ground	365
	70,055
	2,213.592
	584,458
	1,170,099
Tons all other grades	459,035
	1,836,370
	83,602 220,008
Tons sold to local trade	220,008

Tons consumed at the mines	73.612
Aggregate value of the total product\$2,	889,115
Average value per ton lump coal at mines, shipping	\$1.647
Average number of days, active operations	
Average price paid for hand mining	\$0.75
Number of fatal accidents	5
Number of non-fatal accidents	9
	442,718
	245,955
Number of employes to each fatal accident	791
Number of employes to each non-fatal accident	
Ratio of fatal accidents to 1,000 persons employed	1.3

The table following shows the output of each county for the years 1996 and 1907, with the increase and decrease:

COUNTY.	TOTAL TONS, OF CO		Increase.	Decrease.	
	1906	1907			
Livingston	281, 035	269, 811		11, 224	
Marshall	437, 230	471, 725	34, 495		
Peoria	844, 484	1, 027, 123	182, 639		
Putnam	135,004	268, 710	133, 706		
Stark	34, 696	25, 480		9. 216	
Woodford	136,574	150, 743	14, 169	,	
Totals	1, 869, 023	2, 213, 592	365,009	20, 440	
Net increase		344, 569			

The counties of Marshall, Peoria, Putnam and Woodford show an increase over last year of 365,009 tons, while Livingston and Stark show a decrease of 20,440 tons, this leaves a net increase for the district of 344,569 tons.

#### FATAL ACCIDENTS.

The fatal accidents occuring in the district are described as follows:

September 18, 1906, Frank Passero, miner, aged 28 years, single, employed in mine No. 2 of the Cardiff Coal Company. Cardiff, Livingston county, was instantly killed by falling rock, while mining coal at the face of his room.

November 24, 1906, Albert Baggs, miner, aged 23 years, single, employed in the Barr Coal Companys mine. Sparland, Marshall country, was fatally injured by a premature explosion. He was preparing a shot and had placed several charges of powder in the hole and was pushing the powder back with an iron scraper, the powder was ignited by a spark produced by the scraper coming in contact with sulphur spars on the sides of the drill hole.

November 29, 1906, Alex Newsam, timberman, aged 36 years, married, employed in the mine of Newsam Bros., Kingston, Peoria county, was fatally injured by falling rock while preparing to secure the roof of the entry with timbers. He leaves a wife, but no children.

January 2, 1907. John Marland, mine manager, aged 60 years, married, employed at the No. 1 mine of the Wenona Coal Company, Wenona, Marshall county, was fatally injured. He was in the vicinity of the mule stables on the main haulage, the mule which was worked at the bottom of the shaft became unruly, and kicked the tail chain attached to the harness causing it to wrap around Mr. Marland's leg and over the haulage rope, which was moving; the mule started to pull when his leg was caught between the haulage rope, lacerating the flesh on the under side of the knee

and breaking the bones in two or three places. He was taken to his home and the leg amputated, between nine and ten o'clock the following day. He died the evening of January 4, 1907 leaving a widow and four children.

March 13, 1907. Ora Haahn, driver, aged 22 years, single, was killed in I. Wantling & Co.'s mine, Elmwood, Peoria county. The cause of this accident is unknown. When deceased was found his body was lying on the side of a loaded car, with his right shoulder and head in front of the wheels of the third car, it being a three car trip; his cap and lamp were found at a distance of about 15 feet in the rear of the trip, his lamp was crushed but was still hooked in the cap. He was found by the shot firers at about 3:30 p. m. and was dead.

The tables of accidents both fatal and non-fatal follow, also the county tables and recapitulations.

Respectfully submitted,

JAMES TAYLOR,
State Inspector of Mines, Third District, Peoria, Illinois.

### FOURTH INSPECTION DISTRICT-1907.

#### SECOND ANNUAL REPORT.

Counties-Fulton, Hancock, McDonough, McLean, Tazewell.

THOMAS WEEKS, Inspector, Bloomington, Ill.

HON. DAVID ROSS,

Secretary, State Bureau of Labor Statistics, Springfield.

SR—In compliance with the law of the State of Illinois, defining the duties of the state inspectors of coal mines. I have the honor to herewith submit the second anual report as now formed of the coal mines in the fourth inspection district. The tabular statements in this report contain the different items called for in the schedules; the following is a summary of the items contained in the report.

Number of mines	147
Number of new mines	7
Number of abandoned mines	33
Number of shipping mines	33
Number of local mines	114
Total tons all grades of coal.	2,423,166
Tons of mine run coal	527.122
Tons of lump coal	924.853
Tons of egg coal.	359,379
Tons of nut coal	70.469
Tons of screenings coal	503 432
Tons of slack or waste coal.	37.911
Average value per ton of mine run, shipping mines	\$1.277
Average value per ton of lump, shipping mines	\$1.536
Average value per ton of egg, shipping mines	\$1.411
Average value per ton of nut, shipping mines	\$1.242
Average value per ton of screenings, shipping mines	\$0.447
Average value per ton of slack or waste, shipping mines	\$0.237
Aggregate value of total product, all mines	\$2,940,578
Tons loaded on cars for shipment	2.062.944
Tons supplied to locomotives at mines	67.432
Tons sold to local trade	228,243
Tons consumed or wasted at the mines	64.547
Average number of days of active operation shipping mines	226
Tons mined by hand.	2,423,166
Number of miners	3.013
Number of other employes underground	647
Number of boys underground	58
Number of employés above ground	327
Total number of employés	4.045
Number of kegs of powder consumed	118,124
Amount of dynamite used, pounds	1.700
Number of fatal accidents	5
Number of non-fatal accidents	14
Number of wives made widows	1
Number of children left father'ess	4
Number of employés to each fatal accident	809
Number of tons of coal to each fatal accident	484,633
Ratio of fatal accidents per 1.000 persons employed	1.2
Number of employes to each non-fatal accident	
Number of tons of coal to each non-fatal accident	173,083

#### NEW MINES.

The Simmons Coal Co. has opened a new mine one and a half miles north of Canton on the C. B. & Q. R. R. and began mining coal for shipment July 1, 1907. The No. 5 seam was reached at a depth of about 130 feet. The mine is equipped with all the modern improvements and when fully developed will add materially to the output of Fulton county.

The Crescent Coal Co. has opened a small mine at Breeds on the T. P. &

W. R. R.

#### ABANDONED MINES.

The Canton Union Coal Co. has abandoned its mine located on the T. P. & W. R. R. west of Canton.

This is the only shipping mine that has been abandoned during the year; among the local mines there have been the usual changes, a number being abandoned, and a like number opened, taking their places.

#### IMPROVEMENTS.

During the year the Monmouth Coal Company located at Brereton, Fulton county, has installed an electric haulage system in its mine; the plant consists of a 150 K. W. generator and a 10-ton motor, with over head trolley; the generator house is brick 20 by 22 feet. The company has also put in one new boiler 72 inches in diameter, and 18 feet long, with 70 four-inch flues making in all a battery of four boilers. In preparing for the electric haulage in the mine 6,000 feet of 16 pound rails were taken up and replaced by 30 pound rails, laid on ties 6 inches by 6 inches, 5 feet long. The slate in the entries was brushed down for a distance of 3,000 feet. This haulage was completed and put in operation about July 1, 1907, and is giving entire satisfaction; the management expect in a very short time, to bring the output to 1,500 tons a day. The plant was installed by the Goodman Manufacturing Company of Chicago, III.

The Whitebreast Fuel Company during the year installed electric hauage in its E. Mine at Dunfermline, Fulton county, which is doing effective

work.

#### BUSINESS CHANGES.

November 15, 1906, the Whitebreast Fuel Co., disposed of its D. Mine, located at St. David, Fulton county, to W. D. Myers of Canton, who is now operating it. April 30, 1907 the same company sold its mine E, located at Dunfermline, to the Big Creek Coal Company of St. David, this company is now operating this mine.

#### FATAL ACCIDENTS.

September 17, 1906, Benedetto Aslange, miner, aged 47 years, employed in the mine of the Tazewell Coal Company, Pekin, was fatally burned by the explosion of a keg of powder; he had lighted a piece of fuse to test it; while it was burning he threw it into the powder, causing the explosion. He died about eight hours after the accident. He leaves a widow and four children.

September 19, 1906. George Walton, driver, aged 23 years, single, employed in the mine of the Maplewood Coal Co. at Farmington, was instantly killed by a loaded pit car. The deceased was taking a trip of two loaded cars from the parting to the bottom of the shaft; sitting on a seat hung on the front end of the first car; when about 400 feet from the parting the seat became detached from the car, Walton falling in front of the trip; he was dregged about 50 feet.

The driver following him on the road ran into Walton's trip, and going forward found deceased under the cars, his neck was broken and chest

badly crushed.

December 19, 1906, John Entwistle, miner aged 44 years single, in the employ of John Wilson, at Colchester, was instantly killed by falling rock on the roadway of his room about 36 feet from the face; the decased had finished his day's work and was pushing his car out of the room when the rock which had been loosened by a clay slip suddenly fell on him; the rock was about 7 feet long, 5 feet wide and six inches thick.

January 5, 1907, John Bullough, miner, aged 66 years single in the employ of the Norris Coal Mining Company, Norris, was instantly killed by falling rock. The deceased was wedging down some top coal, when the rock which had been loosened by a shot and was partly held by the coal, sud-

denly fell, crushing him beneath.

May 29, 1907. John Vacca, miner, aged 25 years, single, was fatally burned by the explosion of a keg of powder and died from the effects June 1, 1907. The exact circumstances under which the powder was ignited cannot be told, but, it was supposed that the deceased was filling a powder jack from the keg with his lamp on his head and that a spark from the lamp fell into the powder.

In conclusion I desire to thank the county mine inspectors of Fulton, McDonough and Tazewell counties for their active and efficient services during the past year.

Respectfully submitted,

THOMAS WEEKS,

State Mine Inspector, Fourth District, Bloomington, Ill.

### FIFTH INSPECTION DISTRICT.

SECOND ANNUAL REPORT.

Counties-Edgar, Macon, Vermilion.

Tom Moses, Inspector, Westville.

Hon. David Ross,

Secretary, State Bureau of Labor Statistics, Springfield.

Sir-In compliance with the law of Illinois defining the duties of State inspectors of coal mines, I have the honor to herewith submit the second annual report of the coal mines in the fifth inspection district for the year ending June 30, 1907. The district includes the coal producing counties of Edgar, Macon and Vermilion.

The tabular statements of this report contain information in regard to

the number of mines; miners and other employés; the tons of the various grades of coal produced, the selling price per ton, at the mines; the disposition of the product; whether shipped by rail, sold to local consumers or used for steam and other purposes at the mines; the amount of powder and dynamite used at the mines; the fatal accidents, and all non-fatal accidents causing the loss of thirty days time or more.

The following summary is presented for the district:

Number of shipping mines	22
Number of mines in local trade only	43 65
Total number of mines	3.152
Number of miners employed	1.061
Number of others employed underground	
Number of boys underground	168
Number employed on the surface	290
Total number of employes	4,671
	131.702
	,001,108
	315,945
	317.053
	,797,154
Tons sold to local consumers, shipping mines	170,551
	220,220
Total tons to local trade	390,771
	90.334
Tons supplied to locomotives, at mines	38,794
Aggregate value of the total product\$3	387,893
Number of fatal accidents	17
Number of non-fatal accidents	94
Total number of accidents	111
Number of tons to each fatal accident	195.121
Number of tons to each non-fatal accident	35.288
Transfer of the second	,

#### NEW MINES.

The Jordan Coal Company is sinking a mine northeast of Fairmount Vermilion county, about one and one-half miles on the C. & E. I. railroad: the shaft is now down to the coal, and the company intends to rush developments so as to supply that part of the county with coal the coming winter. Reilly & Doughty have opened a drift mine, south of the Vermilion river, at the Western brick plant, west of Danville; they will employ quite a large number of men the coming year. The entire output is consumed by the Western Brick Company of Danville, Vermilion county.

#### CHANGES IN LOCAL MINES.

The usual changes in local mines took place this year. A great many persons who were engaged in the operation of local mines last year have gone out of business; but others have taken their places, consequently about the same quantity of coal is sold from local mines this year as last.

#### ABANDONED MINES.

The Dering Coal Co.'s No. 1 Mine, Westville, Vermilion county, was abandoned January 9, 1907, when the tower was destroyed by fire, it was an old mine and nearly worked out.

The Economy Coal Company of Danville, abandoned its mine at Hillery,

March 1, 1907.

The Kelly Coal Co. of Westville, abandoned its No. 47 mine, which is better known as the Pawnee mine, March 11, 1907.

#### IMPROVEMENTS.

The Decatur Coal Company has ordered a new fan for its mine at Niantic. The Kelly Coal Company of Westville, has been to a great expense fixing up its mines Nos. 42, 45 and 46. These mines were allowed to get into very bad condition by permitting the air courses to become filled with rock and the timbers to be insufficient at nearly all places in the mine. The Company has been hauling the rock out of the mine and dumping it into railroad cars to be carried away; while, at this time, there is a great deal of work to do to make these mines what they should be, yet with a continuation of their present zeal all of the mines will be beyond complaint.

The Dering Coal Company has made great improvements in their mines Nos. 2 and 3; having put in motor haulage in No. 3 and extended the haulage in No. 2. Overcasts are being put in No. 3 mine for the purpose of

splitting the air.

The Sharron Coal and Brick Company has sunk an air shaft and connected it with their main shaft, and are now in good shape.

#### FATAL ACCIDENTS.

August 16, 1907, Andrew Mairek, miner, aged 65 years, married, employed in mine No. 42 of the Kelly Coal Company, Westville, Vermilion county, was killed by falling rock. He leaves a widow and one child.

September 5, 1906. Frank Galley, trackman, aged 48 years, single, employed by D. A. Jenkins, Danville, Vermilion county, was killed by being crushed between the rib of the entry and a car.

October 3, 1906, Elbert Roberts, miner, aged 17 years, single, employed by the Dering Coal Company at its mine No. 3, Steelton, Vermilion county, was

killed by falling rock.

October 9, 1906, John Vicknot, miner, aged 28 years, single, employed by the Dering Coal Company at its No. 2 mine, Westville, Vermilion county, was injured by falling rock; he died from the injuries October 27, at the hospital in Danville.

November 27, 1906, John Paul Jones, miner, aged 61 years, married, employed by the Oakwood Coal Company, Oakwood, Vermilion county, was killed by falling coal. He leaves a widow and seven grown children.

Dec. 14, 1906, Cruso Balint, timberman, aged 35 years, single, employed by the Dering Coal Company at its mine No. 1, Westville, Vermilion county, was killed instantly; he was taking out some low bars on the entry, when a mass of rock gave way falling on him.

January 3, 1907, Domineck Comi, miner, aged 28 years, single, employed by the Blue Mound Coal Company at its mine in Blue Mound, Macon county, was fatally injured by falling rock, so that he died from the injuries January

5 in a hospital in Decatur.

January 15, 1907, Paul Jacks, driver, aged 29 years, married, employed by the Kelly Coal Company at its Himrod mine, Vermilion county, was fatally injured by being crushed between cars. He died January 21 in a hospital in Danville and leaves a widow and one child.

January 12, 1907, John Klosorsky, miner, aged 33 years, married, employed by the Little Vermilion Coal Company, at its mine near Georgetown, Vermilion county, was killed by falling rock while at work in a room.

He leaves a widow and two children.

March 6, 1907. Martin Silinski, miner, aged 40, married employed by the Dering Coal Company at its No. 3 mine, Steelton, Vermilion county, was killed by falling rock while at work in a room. He leaves a widow and two children.

March 8, 1907. Charles Mears, miner, aged 25 years, single, employed by the Kelly Coal Company at its No. 44 mine, was killed by falling rock at the face of the entry where he was working. He leaves a widowed mother.

March 27, 1907, Peter Sima, miner, aged 53 years, married, employed by the Kelly Coal Company at its Himrod mine, Himrod, Vermilion county,

was killed by falling rock. He leaves a widow and four children.
June 4, 1907, John Belski, miner, aged 30 years, married, employed by the Dering Coal Company at its No. 3 mine, Westville, Vermilioh county, was killed by falling rock.

June 12, 1907, Tony Buckinus, miner, aged 26 years, single, employed by

the Dering Coal Company at its mine No. 4, Steelton, Vermilion county,

was killed by falling rock.

June 21, 1907, Matt Ruskis, miner, aged 45 years, married, employed by the Dering Coal Company at its No. 2 mine, Westville, Vermilion county,

was killed by falling rock.

June 24, 1907, William Grey, driver, aged 22, single employed by the Kelly Coal Company at its No. 42 mine, Westville, Vermilion county, was found dead under a car in the mine; it is supposed that his light went out

and that he fell under the car which was being hauled by a mule.

June 24, 1907, Jacob Black, miner, aged 38 years, married, employed by the Jordan Coal Company, one and a half miles northeast of Fairmount, Vermilion county where the company is sinking a new mine. The pump which was placed at the water lodgement, about 40 feet from the bottom of the shaft, got out of order, deceased went to repair the pump and fell from the platform to the bottom, killing him instantly. He leaves a widow and six Respectfully submitted, children.

THOMAS MOSES.

State Inspector of Mines, Fifth District, Westville, Ill.

#### SIXTH INSPECTION DISTRICT-1907.

SECOND ANNUAL REPORT.

Counties-Brown, Cass, Logan, Morgan, Menard, Sangamon, Schuyler.

THOMAS HANNAH, Inspector of Mines, Springfield.

HON. DAVID ROSS.

Secretary, State Bureau of Labor Statistics, Springfield.

SiR—In compliance with the Statute of the State defining the duties of the State inspectors of coal mines, I have the honor to submit the second annual report of the coal mines in the sixth district for the year ended June 30, 1907. The tabular statements of the report give the number of mines; the number of miners and all other employés; the various grades of coal produced, and the number of tons in each grade; the selling price per ton at the mines; the disposition of the product, shipped by rail or sold to local consumers; the number of fatal and non-fatal casualties, and the number of kegs of powder and the pounds of dynamite used.

The following summary presents the main items contained in the tables:

Number of mines in the district	71
Number of new mines opened during the year	3
Number of mines abandoned during the year	. 15
Number of shipping mines	46
Number of local mines	25
Total tons of coal produced	5,777,759
Total tons of mine run coal	1,997,381
Total tons of lump coal	2,094,322
Total tons of egg coal	246.434
Total tons of nut coal	160,488
Total tons of pea coal	1,145,124
Total tons of slack and waste	134,010
Tons loaded on cars at mines for shipment	5,095.888
Tons supplied to locomotive at mines	116,212
Tons sold to local trade	359,091
Tons consumed and wasted at mines	206.568
Tons mined by hand	4,967,505
Tons mined by machine	810,254
Average days of active operation shipping mines	192
Number of mines using machines	4
Machines in use	30
Machines operated by electricity	30
Number of miners	5,206
Other employés underground	1.598
Boys underground.	223
Employés on surface	702
Total number of employés	7.729
Aggregate value of total product	\$5,473,666
Number of fatal accidents	15
Number of wives made widows	10
Number of children left fatherless	29
Number of non-fatal accidents	52
Number of tons of coal to each fatal accident	385,184
Number of tons of coal to each non-fatal accident	111.111
Number of persons employed to each fatal accident	515
Number of persons employed to each non-fatal accident	110
Ratio of persons killed to each 1.000 employed	1.9
Kegs of powder used	252,208
Dynamite used, pounds,	4.760
Average value per ton mine run coal, shipping mines	\$0.927
Average value per ton lump coal, shipping mines	\$1.21

#### COMPARATIVE STATEMENT.

The tons of coal produced by the counties composing the district are shown in the following table for the years 1906 and 1907, with the increase or decrease of tonnage.

Counties.	TOTAL PRODUCTS—ALL GRADES OF COAL.							
COUNTES.	1906	1907	Increase.	Decrease.				
Brown.	1,694	380		1, 314				
Cass	750	1, 625	875

Net increase			617, 152					

Menard county shows a decrease of 25 per cent; Sangamon presents an increase of 17 per cent; Logan county had a very slight increase.

#### ABANDONED MINES.

The Greenview Coal Mining Company has abandoned its mine at Greenview, Menard county. The Illinois Colliers Company has abandoned its mine No. 3 at Chatham, Sangamon county.

#### NEW MINES.

The Greenview Coal Mining Company, Menard county, has put down a new shaft, one mile north of the old one.

Wilkey, Welsh & Fitzgerald have sunk a shaft at Pleasant Plains, Sangamon county; this is intended for local trade.

#### ENFORCEMENT OF THE MINING LAW.

During the year eight miners in Sangamon county have been arrested and fined for violation of the mining law, relating to tamping with coal dust and one for drilling a dead hole.

#### FATAL CASUALTIES.

July 30, 1906. Henog Kopo, top man, aged 22 years, single, was killed at the west end mine, Springfield, the car had slipped off the cage, which was self dumping and while trying to replace the car in position he was caught between the car and the cage.

August 28, 1906, Michael Hickey, cager, aged 39 years, married was killed in.the No. 1 mine of the Springfield Coal Mining Company; deceased was walking over the shaft bottom instead of going around the man-way and was caught by the descending cage. He died three days after the accident and leaves a widow and one child.

September 10, 1906, Charles Hooly, miner, aged 38 years, single, and Charles Pap, miner, aged 41 years, married, were both killed by falling down the shaft at the Mt. Pulaski mine, operated by the Mutual Coal Company.

The engineer fainted and fell on the lever, his weight reversed the engine, and caused the cage on which the men were riding to go to the pulley; the men seeing the danger jumped from the cage falling down the shaft a distance of about 360 feet. Pap leaves a widow and four children.

October 10, 1906, John Stratton, shot firer, aged 49 years, married, was killed in the Springfield Colliery Company Mine, Springfield. His death was caused by firing a dead hole, the shot blowing the tamping causing the

explosion. He leaves a widow and six children.

October 10, 1906, Thomas Hiscock, shot firer, aged 46 years, widower, was killed in the Springfield Colliery Company mine; deceased was firing shots in company with Stratton, at the time of the explosion. He leaves four children.

October 25, 1906, William Wilson, shot firer, aged 35 years, married, was killed in the Cora Coal Co.'s Mine at Andrew, by an explosion caused by

the firing of dead holes. He leaves a widow and one child.

October 25, 1906, Herman Kownatzky, shot firer, aged 19 years, single, died at St. Johns Hospital, Springfield, from injuries received at the Cora Coal Company's mine, while firing a shot in company with Wilson.

November 1, 1906, John Parrish, machine runner, aged 46 years, was killed in the Black Diamond Mine, Auburn, by falling coal while cutting coal

with the machine. He leave a widow and three children.

Nov. 7, 1906, Robinson Ridley, shot firer, aged 26 years, single, was killed in the Illinois Midland Coal Co.'s mine, Sherman; deceased lost his life from a blown out shot.

Nov. 7, 1906, Loren Dunbar, shot firer, aged 33 years, married, was firing shots in company with Ridley, and was fatally injured by the same shot. Two days after the accident he died leaving a widow and two children.

Nov. 20, 1906, John Entnes, machine runner, aged 45 years, single, lost his life at the Clear Lake mine, Sangamon county, by an explosion of powder; deceased was forcing the powder back in the drill hole when it was ignited causing the explosion and his death.

Jan. 11, 1907, Edward Delaney, timberman, aged 50 years, single, was killed in No. 2 mine of the Illinois Collieries Co.; deceased was caught be-

tween two pit cars, crushing his head.

Jan. 12, 1907, Peter Jackson, top laborer, aged 49 years, married, was caught between the bumpers of two railroad cars, which caused his death; he was employed at the Madison Coal Co.'s mine No. 6 at Divernon. He leaves a widow and two children.

May 30, 1907, Haley Haff, driver, aged 33 years, married, was killed in the Black Diamond mine, Auburn, one of the cars of his trip jumped the track knocking out a prop which struck him on the head causing his death

in three hours. He leaves a widow and three children.

Respectfully submitted,

THOMAS HANNAH,
State Inspector of Mines, Sixth District, Springfield, Ill.

#### SEVENTH INSPECTION DISTRICT-1907.

SECOND ANNUAL REPORT.

Counties—Calhoun, Christian, Greene, Jersey, Macoupin, Montgomery, Morgan, Scott, Shelby.

W. W. WILLIAMS, Inspector, Litchfield.

HON. DAVID ROSS,

Secretary, State Bureau of Labor Statistics, Springfield.

SIR—In compliance with the law of the State of Illinois, defining the duties of the State inspectors of coal mines, I have the honor to herewith submit the second annual report of the coal mines in the seventh inspection district. The tabular statements in this report contain the different items called for in the schedules.

A summary of the items contained in this report is presented as follows:

N	
Number of mines	73
Number of new mines	10
Number of abandoned mines	8
Number of shipping mines	36
Number of local mines	37
Tons of mine run coal	1,478,658
Tons of lump coal	3,430,389
Tons of egg coal	126,501
Tons of nut coal	179,150
Tons or pea or screening.	1,331,455
Tons of slack or waste.	172,706
Tons of all grades of coal	6.718.859
Total output for six months, ending Dec. 31, 1906	2,901,474
Total output for six months, ending June 30, 1907	3,760,900
Average value of coal per ton, mine run, shipping mines	\$0.935
Average value per ton of lump, shipping mines	\$1.169
Average value per ton of egg, shipping mines	\$1.324
Average value per ton of nut, shipping mines	\$1.063
Average value per ton of nut, supplied mines.	\$0.446
Average value per ton of pea or screening, shipping mines	\$0.195
Aggregate value of total product, all mines	\$0,423,000
Tons loaded on cars for shipment	6,034,648
Tons supplied to locomotives at mines	185,992
Tons sold to local trade	218,269
Tons consumed or wasted at the mines	279,950
Average number of days of active operation, shipping mines	194
Tons mined by hand	2,572,791
Tons mined by machine	4,146,068
Number of machines in use	317
Number of miners	5,164
Number of other employes underground	1,620
Number of boys underground	231
Number of employés above ground	812
Total number of all employes	7.827
Number of kegs of powder consumed	100,358
Amount of dynamite, pounds	10,475
Number of fatal accidents.	21
Number of non-fatal accidents	113
Number of wives made widows	13
Transport of William Andrews	10

Number of children left fatherless	37
Number of employes to each fatal accident	373
Number of tons of coal to each fatal accident	319.946
Ratio of fatal accidents per 1,000 persons employed	
Number of employés to each non-fatal accident,	69
Number of tons of coal to each non-fatal accident	59.450

#### NEW MINES.

The Burnwell Coal Company has completed the sinking of its No. 22 mine at Witt, Montgomery county. A description of the plant at this mine was given in the last annual report.

#### PROSPECTIVE MINES.

Ground has been broken for a new mine at Farmersville, Montgomery county.

Very slow progress is being made in sinking the mine at Lovington, Moultrie county, on account of the great quantity of sand and water. This is the second trial and has been abandoned for the present. The company is now drilling in search of a more favorable place.

#### Improvements.

The Prairie State Coal Company, Nilwood, Macoupin county, has built a new tower, sixty-four feet high, and installed a steel hopper, a Fairbanks & Morse scales and a pair of first motion hoisting engines; also built a new brick engine house and put in one flue boiler, 150 horse power, and two cylinder boilers, 100 horse power each.

The Hillsboro Coal Company, Hillsboro, Montgomery county, have replaced its old twelve-foot fan with a new twenty-foot one, greatly improv-

ing the ventilation.

Three large coal washeries have been built in this district: One by the Pana Coal Company at its No. 1 mine, Pana, Christian county; one by the Superior Coal Company near Gillespie, Macoupin county. This washery is so situated that the coal from all three of the company's mines can easily be brought to it. Another by the Shoal Creek Coal Company, at its No. 1 mine, Panama, Montgomery county. This company is also installing electric haulage.

The Consolidated Coal Company has rebuilt the washery recently burned

down at its No. 15 mine, Mt. Olive, Macoupin county.

COAL WASHING PLANT OF THE SUPERIOR COAL COMPANY NEAR GILLESPIE.

The coal washing plant of the Superior Coal Company is located on the main line of the Macoupin County Railway, about three miles north of Benld and within a few hundred yards of the crossing of the C., C., C. & St. L. R. R. This washery was designed and built by the American Coal Washer Company of Alton, Ill. Its capacity is 250 tons of coal an hour. The coal is brought to the washery in gondola cars of 80,000 pounds capacity from the three mines of the company.

The coal passes at the mines through a bar screen one and a quarter inches apart. The loaded cars are left standing in front of the washery on a double track having a down grade towards the washery. This down grade of the tracks continues through the washery and beyond the track scales, so that the cars are handled solely by gravity. The washery is built in two symmetrical halves, each independent of the other, but arranged so that in case of break down one side can feed coal to the other side. The coal is taken out of the cars by two car unloaders, one over each of the two tracks. Each of these unloaders has a capacity of four cars an hour. The unloaders clean the cars perfectly, requiring very little hand shoveling. Five men can operate one unloader and handle the cars easily. The cars are pulled against the unloader by a double paper friction winch. Each unloader delivers the coal into the boot of an elevator, which conveys it into a double bin situated above and to the right of the washing jigs. The bottom of

these bins are inclined towards the horizontal at an angle of forty-five degrees and are lined with heavy sheet steel, so that the coal slides by gravity into the jigs. The flow of coal is regulated by iron gates. The car unloaders and coal elevator of each side are driven by manilla ropes attached to a 12 by 14 inch single engine. In front of the coal bins are located the jigs, four on each side. In the jigs the coal is separated from the slate, sulphur and other impurities. These impurities being heavier than the coal, accumulate on the bottom of the jigs and slide out of the jig boxes through the opening in front. Each opening can be operated and regulated by gates. The impurities from the four jigs on one side slide into an elevator located between the second and third jig. This elevator lifts the slate to an elevation where it slides through a chute into a small slate bin located outside of the washery building. This slate bin is built over a narrow gauge track on which a self dumping slate car is operated by means of endless wire rope and hoisting engine.

The coal, after being freed from all impurities, flows over the front of the jigs and is sluiced into a large revolving screen, where all of the water is drained off and the coal separated into two sizes. The coarse coal which goes over the screen drops into an elevator, which delivers it into bins located over the railorad tracks. By means of sliding gates in the bottom of these bins the coal can be loaded into the railroad cars. The fine coal which passes through the screen and all the water are collected into a settling tank. The coal settling in the bottom of this tank is conveyed by means of a double flight conveyor to an elevator which delivers the coal on to the shaking screen. On this shaking screen the coal is thoroughly sprinkled and rinsed with fresh water, which removes all the fine particles of fire clay, the fine coal leaving the shaking screen perfectly clean and dry. An elevator takes the coal from the shaking screen and delivers it into washed coal bins. Each of the two slides is driven by a 13 by 16 twin engine. The power is transmitted by means of manilla ropes.

On one side of the railroad tracks and within thirty feet of the washery building the boiler house is located. This building is a brick structure, with timber roof trusses and brick floor. It contains four 150 horse power returnibular boilers, two feed pumps and one water heater. Coal for the boilers is delivered from the head of the washed coal elevators by a chute.

The washery building is 142 by 130 feet and 83 feet high to the ridge pole of the roof over the natural coal bin. The building is enclosed with drop siding and the roof covered with prepared gravel roofing paper. The engine rooms have concrete floors. During the winter the buildings will be heated by steam.

#### FATAL ACCIDENTS.

Judy 14, 1906, Mike Riley, sinker, aged 37 years, single, employed in sinking the Peabody mine at Nokomis, Montgomery county, had taken sufficient dynamite down in a box to charge eight holes. When five of the holes had been charged it was discovered that the sawdust in the box containing the remaining dynamite had taken fire. Riley was in the act of upsetting the box into the water when the dynamite exploded, blowing him to pieces. His home was in Braidwood, Ill. Five other men were in the shaft at the time, but escaped unhurt.

July 25, 1906, Lawrence Bowman, driver, aged 25 years, single, employed at the No. 1 mine of the Illinois Collieries Company, Virden, Macoupin county, was bringing out a trip of loaded cars to the double parting where other loaded cars were standing, and while unhooking his mule did not get out of the way in time to avoid being caught between his trip and the stand-

ing loads. He lived about eight hours.

August 21, 1906, Sam Voigt, top boss, aged 44 years, married, employed by the Consolidated Coal Company at its mine No. 15, Mt. Olive, Macoupin county, was taking a loaded railroad car from under the dump, walking backwards in front of the car, when his heel caught in a guard rail, throwing him down, the car running over his leg, cutting it off. He died next day. He leaves a widow and seven children.

September 8, 1906, David Hosking, miner, aged 23 years, single, employed by the W. H. Bates Company, Winchester, Scott county, was caught under a piece of slate at the face of his working place and was fatally injured, dying three days afterwards.

September 8, 1906, Joseph Hoelting, miner, aged 47 years, married, employed by the Carlinville Coal Company, Carlinville, Macoupin county, was caught under falling coal at the face of his working place. Deceased was cutting the coal on one side in order to bring it down, when it suddenly fell, killing him instantly. He leaves a widow and five children.

September 18, 1906, L. C. Foster, carpenter, aged 35 years, single, employed at the Royal Colliery Company washery, Virden, Macoupin county, was on a scaffold painting, about forty feet from the ground, when, from some cause unknown, he fell to the ground, striking his head on the track rail. He

died instantly.

September 20, 1906, Simon Malle, timberman, aged 43 years, married, employed at No. 6 mine of the Consolidated Coal Company, Staunton, Macoupin county, was sent with others to clean a fall on the entry. It happened that there was some loose slate still hanging, of which he had been warned by other workmen. However, he did not heed the warning and went to work under the slate, when it fell on him, killing him instantly. He leaves a widow.

October 1, 1906, Ed. Haum, cager, aged 25 years, married, employed at mine No. 15 of the Consolidated Coal Company, Mt. Olive, Macoupin county, was in the act of pushing a loaded car on to the cage, when other loaded cars followed from behind and he was caught between the cars, causing injuries from which he died three days later. He leaves a widow and two children.

October 13, 1906, Joseph Dunko, laborer, aged 35 years, married, employed at mine No. 8 of the Consolidated Coal Company, Mt. Olive, Macoupin county, was caught under falling rock and killed instantly. He was working with a timberman and another helper, when the rock showed signs that it was about to fall. The timberman and the other helper ran to a safe place and repeatedly told Dunko to do the same, but he did not heed the warning. Had he moved three feet he would have been clear. His dependents, if any, are unknown and live in Europe.

October 28, 1906, William Radford, sinker, aged 33 years, married, working at mine No. 22 of the Burnwell Coal Company, Witt, Montgomery county, was being lowered in the bucket when the drum became detached from the engine, and not having a break on the drum, the engineer had no control over it. There were two men in the bucket when it dropped 100 feet to the bottom, killing Radford instantly. He leaves a widow and three children. The other man was badly injured, an account of which is given in

the non-fatal accidents.

January 7, 1907, Albert Mauer, driver, aged 24 years, single, employed at mine No. 1 of the Superior Coal Company near Gillespie, Macoupin county, was found dead under the front car of the trip he was taking to the bottom. It is supposed that he was riding on the front end of his trip and fell under the car. This part of the mine has a heavy grade, requiring several spraggs. The usual number was found on the trip. His home was in Collinsville, Ill.

January 15, 1907, August Smith, trapper, aged 71 years, married, employed at mine No. 10 of the Consolidated Coal Company, Mt. Olive, Macoupin county, was run over by a trip of cars and killed. He was employed to trap a door at the foot of a steep hill. The driver had to get his trip from different entries and make it up on top of this hill. Two of the cars started down the hill towards the door. The trapper supposing that it was the driver coming with his trip, opened the door and walked leisurely down the track to where he was accustomed to pull out the sprags. Being partly deaf he could not hear the cars until it was too late for him to get out of the way. He leaves a wife and three grown children.

January 29, 1907. William Wertzel, miner, aged 38 years, single, employed at the Carlinville Coal Company's mine, Carlinville, Macoupin county, was caught under a very large falling rock at the face of his working place and instantly killed. He leaves his mother, who was dependent on him for support.

January 31, 1907, John Gray, shot firer, aged 29 years, single, working in the Royal Colliery Company's mine No. 1, Virden, Macoupin county, was killed instantly. He had just lit a shot on the rib of one room and went into the next to charge and fire a shot there. Not knowing that the pillar between the two rooms was thin, the result was, when the shot went off, it blew through, throwing the coal clear across the other room, killing him instantly.

March 14, 1907, William Loedke, laborer, aged 71 years, married, employed mine No. 10 of the Consolidated Coal Company, Mt. Olive, Macoupin county, was found dead under a loaded car. The duty of deceased was to pick up loose coal falling off of the cars. He had loaded the car under which he was found and had placed his shovel on top of the car. He had also spragged two wheels, and after hooking his mule to the car proceeded towards the shaft bottom. It is supposed that he was walking between the mule and the car and fell, when the car ran on to him. He leaves a widow and three grown children.

March 23, 1907, John Grushalla, miner, aged 56 years, married, was fatally injured by being run over by a trip of cars in mine No. 2 of the Superior Coal Company at Benld, Macoupin county. He had finished his day's work and was waiting with others to be hoisted to the top, when a trip of cars was sent to the bottom. Deceased started across the track just at the time the trip arrived and was knocked down and under the cars. He

died that night. He leaves a widow and five children.

April 10, 1907, Anton Wollner, miner, aged 35 years, married, employed by the Smith-Lohr Coal Mining Company at Pana, Christian county, was struck on the head by a small piece of coal that fell from near the roof at the face of his room, fracturing his skull and killing him instantly. He leaves

a widow, but no children.

April 30, 1907. Fred Smith, laborer, aged 30 years, married, working for the Illinois Collieries Company at its mine No. 7, Litchfield, Montgomery county, was found dead under a fall of slate in a room where he had been left to clean up some slate that had previously fallen. He was sent to this place with a timberman and another laborer to do this work and was given instructions to remain and finish the work. The timberman and the other laborer were called away to do other work, but when they returned they found Smith dead under some slate some distance in from where he was left. It is not known why he went there. He leaves a widow and three children.

May 17, 1907, Emil Micknic, driver, aged 18 years, single, was found dead under his loaded trip in mine No. 7 of the Consolidated Coal Company, Staunton, Macoupin county. It is supposed that he was riding on the front end of his trip and seeing his whip falling off of his shoulder, made a grab for it and fell. His whip was found fifteen feet from where he was found.

June 4, 1907, Lewis Hart, miner, aged 58 years, married, was found dead under some coal at the face of his room in the mine of the Penwell Coal Company, Pana, Christian county. Deceased and his partner had left the room to secure some rails and ties for tracking when, on their way out, Hart suddenly turned and went into his room. When his partner returned, having been away not more than ten minutes, he found deceased under the coal. It was what is termed a standing shot and deceased knew that it was very dangerous. He leaves a widow and four grown children.

June 25, 1907, Charles Tiffin, top laborer, aged 28 years, married, was killed by falling into the shaft of the Hillsboro Coal Company, Hillsboro, Montgomery county. He and two others had taken a car off of the cage at the lower landing and the signal was given by the foreman to the engineer to hoist the cage to the dump. Tiffin got on to the cage after the signal was given and when the cage started jumped off, falling into the shaft. Ho

leaves a widow and two children. Respectfully submitted,

W. W. WILLIAMS.

### EIGHTH INSPECTION DISTRICT-1907.

#### SECOND ANNUAL REPORT.

Counties-Bond, Crawford, Effingham, Fayette, Jasper, Monroe, Madison, St. Clair.

Walton Rutledge, Inspector, Alton.

HON. DAVID ROSS.

Secretary, State Bureau of Labor Statistics, Springfield, Ill.

SIR—In compliance with section 12 of an Act of the General Assembly of Illinois, defining the duties of State Inspectors of coal mines, I have the honor of herewith submitting to you the second annual report for the eighth district. The counties of Bond, Madison and St. Clair are the only coal producing counties in the district. The following tables give all the necessary information in regard to the number of mines, miners and other employés; the various grades of coal produced and the number of tons of each with the selling price per ton at the mine; the disposition of the product of the mines, whether shipped, sold to local consumers or used for producing steam at the mines; the quantity of powder used at the mines and a statement of all fatal and non-fatal accidents.

The following summary for the district is presented for the year ended June 30, 1907:

Number of shipping mines	78
Number of mines in local trade only.	37
Total number of mines in local trade only	115
Total number of mines	
Number of miners employed.	6,432
Number of others employed underground.	1,837
Number of boys underground	169
Number employed on the surface.	905
Total number of employés	9,343
Number of kegs of powder used.	159.841
Number of kegs of powder used	
	1,788,461
	3,886,099
Tons of egg coal produced.	305,533
Tons of nut coal produced.	283.481
Tons of screening.	1,591,311
Tons of slack or waste	290.315
Total number of tons produced	8.145,200
Total number of tons produced.	
Tons shipped on railroads.	7,543,606
Tons supplied to locomotives	61,940
Tons sold to local trade	282,963
Tons used at mines	256,691
Aggregate value of total product at mines	7.043,115
Number of fatal accidents.	24
Number of non-fatal accidents.	
Number of non-latar accidents.	389
Number of employes to each fatal accident	
Number of employes to each non-fatal accident	118
Tons of coal produced to each fatal accident	339,383
Tons of coal produced to each non-fatal accident	103,104
•	

Tons of coal produced to each miner employed	
Tons of coal produced to all employés	869
Ratio of fatal accidents per 1,000 persons employed	2.6
Average number of days at shipping mines	182
Number of mines using machines	
Number of machines in use	
Tons of coal mined by hand	
Tons of coal cut by machines 4	,610,008

Coal production by counties, with the increase for the year ended June 30, 1906, and June 30, 1907, is shown in the following table:

9	TOTAL OUTPU	T IN TONS	
COUNTIES.	1906.	1907.	Increase.
Bond	130, 521	136, 967	6, 440
Madison	3, 031, 553	3, 573, 163	541, 610
St. Clair.	4,168,019	4, 435, 070	267, 05
Total	7, 330, 093	8, 145, 200	815, 10
Net increase		815, 107	

The district shows a net gain of \$15,107 tons, which is largely due to mines Nos. 1 and 2 of the Mt. Olive and Staunton Coal Companies at Staunton and mine No. 17 of the Consolidated Coal Company at Collinsville. This is a large increase when taken into consideration that 75 per cent of the mines in St. Clair county only worked three-fourths time, as shown by the tables of daily output.

#### ABANDONED MINES.

The Consolidated Coal Company of St. Louis, Mo., have abandoned the Abbey No. 3 mine and the Heintz Bluff mine, both at Collinsville. The Madison Coal Corporation of St. Louis, Mo., abandoned its No. 7 mine at Ogles Station April 1, 1907. The Dutch Hill Coal Company of New Athens has abandoned its mine at that point. These mines were all of the shipping class of mines. The local mines of John Marshall at Caseyville, John Harst at Belleville and Richard Grossman at Millstadt, all in St. Clair county, have been abandoned.

#### IMPROVEMENTS.

The St. Louis and O'Fallon Coal Company of East St. Louis has made great improvements at its Nos. 1 and 2 mines, on the line of the St. Louis & O'Fallon Railway, near French Village. At their No. 1 mine a new steel tower has been erected, the steam power increased, the hauling roads in the mine graded and heavy T rails laid, with a view of putting in motors. At No. 2 mine the hauling roads in the mine have been graded and large quantities of slate taken down. Heavy T rails have been laid, with a view of also employing motors in this mine. The Donk Bros. Coal and Coke Company of St. Louis, Mo., have made extensive improvements at their No. 2 mine at Marysville, Madison county. Two new boilers, each 150 horse power, and a generator of 200 K. W. have been installed. Two thirteen-ton motors have been installed. The tracks in the mine have been graded, the bottom taken up and the slate taken down and the tracks laid with forty pound T rails. A separate traveling way for the employés has been constructed, separated from the motor roads; also proper passages, so that all the caging will be done on one side of the shaft.

The Pocahontas Mining Company, Pocahontas, Bond county, has finished the escapement and air shaft to its mine during the year. The work has been well done and includes a suitable stairway. A cage will be kept at the air shaft to be used at any time for repairs. A very substantial tower has been erected at the hoisting shaft with shaking screens and dump cages. Two new boilers have been installed, each 150 horse power. A Norwalk compressor and five mining machines have been installed. engines are double, first motion, 22 by 36 inches. The engine, boiler and compressor houses are built very substantial and are intended to be fire proof.

Electric motor haulage has been introduced into the New Staunton Coal

Company's mine, Livingston, Madison county, during the year.

The Lumaghi Coal Company of Collinsville, Madison county, has made great improvements in its No. 2 and No. 3 mines, grading the underground haulage roads with the intention of putting in motor haulage.

#### COAL WASHING PLANTS.

The DeCamp Coal Company of St. Louis, Mo., has built a new washery at its mine near Staunton. The capacity will be about 200 tons an hour.

The Southern Coal and Mining Company of St. Louis, Mo., has built a new washery on the main line of the Southern Railroad, near Coulterville station, in St. Clair county. There are now four coal washing plants in Madison county, as follows: Donk Bros. Coal and Coke Company, No. 1 mine, Donkville: Lumaghi Coal Company. Collinsville; Madison Coal Corporation, No. 2 mine, Glen Carbon, and the DeCamp Coal Mining Company, Staunton There are two in St. Clair county, one at the Consolidated Coal Company's No. 17 mine, Collinsville, and one on the Southern Railroad at the mine of the Southern Coal and Mining Company at Belleville. In the southern part of East St. Louis there is a large coal washing plant in operation. It is owned by the Bessemore Washed Coal Company. Large quantities of fine coal are shipped from Madison and St. Clair counties to this washery. company buys the slack or screenings from the various small mines and wash it for the St. Louis market. The consumption of washed coal is largely on the increase.

#### CHANGE OF CORPORATE NAME.

The Humboldt Coal Company, Belleville, will be known hereafter as the Swansea Coal and Mining Company. The Hartman Coal Company will be known as the White & Nesbit Coal Company. The Ruby mine, near Caseyville, which was not in operation last year, has been operated about half, time this year by the Cludy-Miller Coal Company of St. Louis, Mo.. The Southern Coal and Mining Company's No. 2 mine. Belleville, has not been operated during the year, owing to a large fire in the underground workings. Both shafts had to be sealed up. Whenever it is found that the fire is out the mine will be put in operation.

#### NEW MINES.

Only one shipping mine has been opened in the district during the year. A company known as The French Village Coal Company has sunk a shaft near the line of the Louisville & Nashville Railroad and the St. Louis & O'Fallon road, near French Village, St. Clair county. Only a small quantity

of coal has been taken out up to June 30, 1907.

The coal business has been very dull since April 1, 1907, particularly in St. Clair county. A number of mines have been closed down, namely: The Southern Coal and Mining Company closed down its mines, Nos. 1, 3, 4, 5 and 6, April 1, 1907. These mines are yet closed. The Valley Coal Company, Summitt Coal Company, Royal Coal Company, Ruby Coal Company and the Advance Coal Company, all in St. Clair county. However, they expect to start up again September 1, 1907. The Edwardsville Coal Company's mine at Edwardsville, Madison county, has not been in operation since April 1, 1907, but this company will put the mine in operation again September 1, 1907.

A number of mines in both St. Clair and Madison counties have only worked one or two days a week. The Beatty Coal Company of Shiloh Valley, near Mascoutah, St. Clair county, has been in operation this year with a slight output. This mine was not in operation last year. Also the Ruby mine near Caseyville has been in operation during the year, but was not operated last year. The mine of the Madison Coal Corporation, No. 7, is not reported abandoned in the tables. The company operated the mine until March 1, 1907, hence they are reported as operating. However, everything around the mine has been dismantled.

#### MINE FIRES.

In February the tower, slack bins, screens and out housings of the Royal Coal and Mining Company's mine near Belleville were destroyed by fire. Since then everything has been rebuilt. However, the mine has done very

little work since. The cause of this fire is not known.

The fan house at the Superior Coal Company's mine, Belleville, was destroyed by fire in May, but has been rebuilt. The fan is run by an electric motor. The power is obtained from the St. Louis & Belleville electric road at a very high voltage. It was supposed this fire was caused by the electric wires.

The following is a detailed account of the fatal accidents which have

occurred in the district during the year:

August 8, 1906, John Gudderson, driver, aged 24 years, single, was found dead under a loaded trip of cars in the Lumaghi Coal Company's No. 2 mine,

Collinsville, Madison county.

September 11, 1906, Peter Ecketa, miner, aged 22 years, single, was badly injured by falling slate at the face of his working room, from which he died two hours afterwards. The accident occurred in the No. 2 mine of the Mt. Olive and Staunton Coal Company, Williamson, Madison county.

Olive and Staunton Coal Company, Williamson, Madison county.

September 28, 1906, John Loose, driver, aged 20 years, single, was killed by being caught between a mine car and the coal rib in the New Staunton Coal Company's mine, Livingston, Madison county. It was supposed that he was leaning over the side of an empty car in which he was riding to

put a sprag in one of the wheels.

October 20, 1906, Wesley Lamb, trackman, aged 20 years, single, was killed in the Kerns Donnewald Coal Company's mine at Worden, Madison c'ounty. Deceased was struck by a mine car on which was Trails. He switched his working truck into a room switch, but did not put the truck in far enough. A driver passing with an empty trip struck the rails and the car, which caught Lamb, killing him.

October 23, 1906, Charles Horton, miner, aged 30 years, married, was

October 23, 1906, Charles Horton, miner, aged 30 years, married, was killed by falling slate at the working face in the New Staunton Coal Company's mine, Livingston, Madison county. He leaves a widow and one child.

November 1, 1906, John Murry, miner, aged 19 years, single, was killed by falling clod near the working face in the Donk Bros. Coal and Coke Company's No. 1 mine, Donkville, Madison county.

November 5, 1906, Albert Herman, miner, aged 18 years, single, was killed by falling clod at his working face in the St. Louis and O'Fallon Coal Com-

pany's No. 1 mine, Nigger Hollow, St. Clair county.

November 24, 1906, Robert McKaw, machine helper, aged 23 years, single, was killed by falling coal in the Breese Trenton Coal Company's mine, two miles west of Trenton, St. Clair county. He was shoveling from the machine when the coal fell on him.

December 22, 1906, Anton McKrosky, miner, aged 29 years, married, was killed by falling slate in the Madison Coal Corporation mine No. 4, Glen

Carbon, Madison county. He leaves a widow and two children.

January 12, 1907, Natal Mental, miner, aged 19 years, single, was killed, being struck by a crowbar, in the Prairie Coal Company's mine near O'Fallon, St. Clair county. He was taking down top coal with the bar when it slipped, striking him. He was injured internally and died from the effects January 16.

January 19, 1907, Joseph Forsyth, miner, aged 39 years, single, was killed by falling slate in the Prairie Coal Company's mine near O'Fallon, St. Clair

county. The slate fell at the working face.

January 26, 1907, Anton Tournelle, machine helper, aged 35 years, married, was killed by falling slate in the St. Louis and O'Fallon Coal Company's No. 2 mine, Nigger Hollow, St. Clair county. The slate fell at the working face. He leaves a widow and four children.

January 29, 1907, Sam Graham, miner, aged 51 years, was fatally injured by falling slate at the working face. He died February 9. Deceased was working in the mine of the New Staunton Coal Company, Livingston, Madison

county. He leaves a widow and four children.

February 9, 1907, John Triskey, mine manager, aged 56 years, married, was killed by falling rock near the working face of a room in the Home Trade Coal Company's mine, Edwardsville, Madison county. He was in the act of examining the room as to its safety for men to work at the time when the rock fell. He was sounding the roof with a pick. He leaves a widow.

February 15, 1907, Ed. Crabtree, miner, aged 21 years, married, was killed by falling clod at the working face in the Kerns-Donnewald Coal Company's

mine, Worden, Madison county. He leaves a widow.

March 4, 1907, Phil Hunsinger, miner, aged 47 years, married, was killed by falling slate at the working face in the Mt. Olive and Staunton Coal Company's No. 1 mine near Staunton, Madison county. He leaves a widow and five children.

April 18, 1907, Charles Cromer, driver, aged 33 years, married, was killed in the Boarders Coal Company's No. 1 mine, Marissa, St. Clair county. He was in the act of unhitching his mule from a mine car when he fell, the

car running on to him. He leaves a widow and two children.

April 23, 1907, Alfred Coapley, miner, aged 38 years, single, was killed by falling slate at the working face in the Donk Bros. Coal and Coke Com-

pany's No. 3 mine, Troy, Madison county.

May 4, 1907, John Seibert, shot firer, aged 50 years, married, was fatally injured by flying coal from a shot. He died from the injuries received June 13, 1907. Deceased was employed in the White and Nesbit Coal Company's mine, Belleville, St. Clair county. Seibert was in the act of going back to a shot which he supposed had missed fire when the shot exploded, with the result as stated. He leaves a widow and five children.

May 28, 1907, James Gussach, miner, aged 47 years, married, was fatally injured by being struck by a crowbar, from which he died June 1, 1907. Deceased was in the act of taking down top coal when the bar swung around, striking him and injuring him internally. He was employed in the Mt. Olive and Staunton Coal Company's No. 1 mine near Staunton,

Madison county. He leaves a widow and four children.

May 28, 1907, Herman Tewess, miner, aged 26 years, single, was fatally injured by falling rock at the working face, from which he died June 29, Deceased was employed in the Hibbard Coal Company's No. 2 mine, Belleville, St. Clair county.

June 21, 1907, George Wepstitus, machine runner, aged 36 years, single, was fatally injured by falling slate at the working face in the Lumaghi Coal Company's No. 2 mine, Collinsville, Madison county. He died July 7, 1907.

June 21, 1907, Ernest Lah, machine helper, aged 32 years, married, was killed by falling coal at the working face in the New Staunton Coal Company's mine, Livingston, Madison county. He leaves a widow and two children.

June 24, 1907, Henry H. Hacker, miner, aged 54 years, widower, was killed by falling slate in the Boarders Coal Company's No. 1 mine, Marissa, St. Clair county. He was working alone and it was supposed that he was taking down top coal when the slate fell.

Following will be found the tables for each county, also the tables for fatal and non-fatal accidents. Respectfully submitted,

WALTON RUTLEDGE,

### NINTH INSPECTION DISTRICT, 1907.

#### SECOND ANNUAL REPORT.

Counties—Clinton, Franklin, Jefferson, Marion, Perry, Randolph, Washington.
W. S. Burris, Inspector, Duquoin.

HON. DAVID ROSS.

Secretary, State Bureau of Labor Statistics, Springfield, Ill.

SIR—In compliance with the statute of the State defining the duties of the State Inspectors of coal mines, I have the honor to herewith submit the second annual coal report of the coal mines in the ninth inspection district for the year ending June 30, 1907. The tabular part of the report gives the number of mines in operation, both shipping and local; the thickness of the coal seam; the number of men and boys employed in the mines and of all others employed around the mines; the total output in tons of all grades of coal and the aggregate value of the total product in the district; the casualties in and around the mines, both fatal and non-fatal. The following summary for the district is presented for the year ending June 30, 1907:

Number of min-	67
Number of mines.	
Number of new mines	10
Number of abandoned mines	5
Number of local mines	10
Total output of tons, all mines	5,582.245
Tons of mine run coal	1.627.869
Tons of lump coal.	1.832.947
Tons of egg coal.	502,479
Tons of nut coal.	351.880
Tons of hut coal.	1,166,406
Tons of screenings	
Tons of slack or waste	100.664
Tons loaded on cars for shipment	4,845,735
Tons supplied to locomotives	299,453
Tons sold to local trade	163,744
Tons consumed or wasted at mines	273.313
Tons mined by hand.	3,860,056
Tons mined by machines.	1.722.189
Average number of days of active operation shipping mines	200
Number of mines using machines	14
Number of machines in use	144
Number of machines using compressed air	95
Number of machines using electricity	49
Number of miners	4,852
Number of other men underground	1.317
Number of men above ground	949
Number of boys underground.	116
Total number of employes	7.234
Average value of lump coal a ton at mine.	\$1.20
Average value of mine run coal	\$0.911
Average value of egg	\$1.185
Average value of nut	\$1.071
Average value of screenings	\$0.546
Average value of slack or waste	\$0.219
Total valuation of product	\$5,326,521
Number of fatal accidents	20
Number of non-fatal accidents	20
Number of wives made widows.	17
Number of children left fatherless.	51
Number of Chirchen left latherless	51

Number of tons produced for each fatal accident	279,112
Number of tons produced for each non-fatal accident	
Number of persons employed to each fatal accident	
Ratio of fatal accidents to 1,000 persons employed	
Number of kegs of powder used for blasting coal	
Number of kegs of powder used for other purposes	1,907
Number of pounds of dynamite for blasting	4 246

The following gives the total tons produced in each county for the years 1906 and 1907, with the increase and decrease:

Counties.	TOTAL PRODUCTS ALL GRADES OF COAL.										
COUNTES.	1906	1907	Increase.	Decrease.							
Clinton	770,689	1, 061, 410	290, 721								
Franklin	387, 230	863, 165	475, 935								
Jefferson	20, 292	10,060		10, 232							
Marion.	826, 280	1, 084, 783	258, 503								
Perry	1, 453, 766	1,743,922	290, 156								
Randolph	572,001	742,894	170,893								
Washington	95, 796	68,768		27, 028							
White	6.585	7. 243	658								
Totals	4, 132, 639	5, 582, 245	1,486,866	37, 260							
Net increase			1,449,606								

#### NEW MINES.

The Norris City Coal Company, located at Norris City, White county, completed the sinking of its air shaft February 16, 1907. This shaft is 640 feet deep and is 7 by 10 feet, with four feet taken off for a stairway, leaving air chamber 7 by 6 feet.

The Big Muddy and Carterville Coal Company of Carterville has opened a mine on the Iron Mountain Railway at Royalton, two miles west of Zeigler. The main shaft is 10 by 16 feet in the clear. The air shaft has an air chamber 5 by 8 feet in the clear, with a manway 4 by 8 feet. The tipple is constructed of wood. The hoisting engines are the Aetna make, 20 by 36 inches, with a six-foot cast iron drum. The hoisting rope is one and a quarter inch steel. The cages are self dumping, of the Bond manufacture. The fan is sixteen feet in diameter. Two boilers are installed of the Galesburg make, seven-sixteenth inches shell, seventy-two inches in diameter and

eighteen feet long, with seventy four-inch flues.

The Sesser Coal Company has opened a new mine, located on the C., B. & Q. Railroad, one and one-half miles from Sesser, Franklin county. The main shaft is 10 by 18 feet in the clear, timbered with 6 by 12 inch plank to the rock. The air shaft is 10 by 15 feet, with four feet off for a manway. The coal seam is 9 feet 10 inches thick and 723 feet below the surface. The plant was completed September 10, 1906. The hoisting engine is of the first motion type, 24 by 46 inches, made by Crawford & McCrimmon. The fan and the fan engines are of the same make. The fan is twenty feet in diameter and the engine 12 by 24 inches. The company has installed three Gem City boilers, 72 inches by 18 feet, with eighty-four flues. The boiler and engine rooms are built of brick and are fire proof. The fan house is also built of brick and stands twenty feet from the air shaft. The air chamber is tunneled to the air shaft. This would protect the fan in case of an explosion. The tipple is constructed of steel, with an end pull to the hoisting engine. The sheave wheels are set tandem, one above the other.

The company has installed a Smith gravity box car loader, to handle coal for the northern trade, this trade being mostly confined to box cars. The arrangement seems to give the best of satisfaction for handling the egg coal, which can be loaded in box cars. The company has an Ottumwa box car loader. A large shaker screen is used to grade the coal. The mine track is forty-two inch gauge, with forty pound steel rails on the main and cross entries. The cars are of three and one-half ton capacity and when loaded to their extreme capacity hold four and one-fourth tons. The bottom of the shaft on the loaded track side has a fall of 1½ per cent for 400 feet, giving a splendid action for loaded cars. The company is undecided in the matter of installing an empty car lift of the Danville manufacture or to blast up the bottom and make a gravity for the empty cars, both plans having their respective advantages.

The United Coal Company's new mine is located on the C., B. & Q. and Illinois Central Railroads, at Christopher, Franklin county. This shaft is 500 feet deep, with a seam of coal 9 feet and 7 inches. The main shaft is 10 feet by 16 feet. The air shaft is 9 by  $13\frac{1}{2}$  feet, the air way being 9 by 9 feet. The engine is of the Danville make, first motion, 24 by 42 inches. There are four boilers installed of the Erie, Pa., make, 72 inches by 18 feet, with seventy-two four-inch flues. The fan is of the Capell make, 6 by 13½ feet. The dynamo is of the Morgan-Gardner make, 150 K. W. The fan house is built of brick and concrete, standing twenty feet from air shaft, with a tunnel running to the air chamber equipped with a pair of relief doors, in case of an explosion. The blacksmith shop, boiler and engine rooms are The main office is at the mine and is also built of constructed of brick. brick, steam heated, with bath room in connection. The tipple is constructed of steel, with a large shaker screen and two box car loaders, one a Christy, the other of the Ottumwa make. The scales for weighing the coal into railroad flat cars are placed, one above the mine switches to weigh the empty cars and one below the switches to weigh the loaded cars. This is one of the up-to-date mines in southern Illinois.

The Zeigler District Colliery Company has sunk a new mine, on the C., B. & Q. Railroad, Christopher, Franklin county. The shaft is 517 feet deep, with a 10-foot vein of coal. The main shaft is 10 by 16 feet; the air shaft 8 by 12½ feet. The engines are the Litchfield make, first motion. 24 by 42 inches. There are four Erie, Pa., boilers, 18 feet by 72 inches. The boiler room, blacksmith shop and engine houses are built of brick and are fire proof. The tipple is constructed of steel, with shaker screens. The pit cars have a capcity of three tons. This mine when fully developed should pro-

duce a large tonnage with its modern equipments.

The W. P. Rend Coal Company has opened a new mine on the C., B. & Q. Railroad, four miles northwest of Benton, Franklin county, and is now in operation. The mine is 575 feet deep, with a good 10 foot 9 inch seam of coal. The main shaft is 10 by 18 feet; the air shaft 10 by 13 feet, with \$\frac{1}{2}\$ mainway 4 by 10 feet. The hoisting engine is 24 by 42 inches; the hoisting rope is steel, 13% inches. Five boilers are installed, size 17 feet 11 inches by 72 inches, with seventy-eight four-inch flues; also one dynamo, 100 K. W. and one 150 K. W. The coal is mined with two electric Morgan-Gardner machines. The buildings, consisting of blacksmith shop, boiler and engine rooms, are constructed of brick and are fire proof. The tipple is steel, with shaker screens. This mine is equipped with sufficient machinery, when devéloped, to insure a large tonnage.

The Coöperative Coal Company, Breese, Clinton county, is now in active operation. The mine is situated on the B. & O. Railroad, one mile east of Breese. The depth to the coal is 390 feet to a seam of 7 feet and 6 inches. The main shaft is 9 by 18 feet in the clear, timbered with 6 by 8 inch yellow pine. The air shaft is 10 by 16 feet, also timbered with 6 by 8 inch yellow pine for the first thirty feet; the remaining distance is timbered with 4 by 8 inch yellow pine. At this mine there is a pair of 34 by 60 inch Danville engines and four 72 inch by 20 feet. Erie boilers. The fan is eighteen feet in diameter; fan engine is St. Louis make, 12 by 18 inches. Coal is hoisted

in the Fletcher skip, the coal being dumped at the bottom of the shaft into a large hopper. The pit cars hold three tons of coal. The bottom is laid out on the plan of the three-entry system to the second pair of cross entries. The boiler, engine and blacksmith buildings are built of brick. The tipple is a wood structure with shaker screens. This mine is laid out to handle a very large tonnage.

#### IMPROVEMENTS IN MINES.

The Moffat Coal Company, Sparta, Randolph county, has installed a Sullivan compressor and ten Sullivan machines, the company believing that it will attain better results in the quality of coal at its mine.

The Odin Coal Company, Odin, Marion county, has installed a high speed fan, run by a small generator at the face of the workings. The fan is placed one and one-half miles from the bottom of the shaft, running at a speed of 250 revolutions a minute, producing 40,000 cubic feet of air. This relieves all pressure on stoppings. Before this fan was installed 5,000 cubic feet of air was all that could be forced to the face of the workings.

#### ABANDONED MINES.

The Great Central Coal Company, Duquoin, Perry county, has abandoned its mine, known as the old Mifflin mine, four miles west of Duquoin. The machinery has not been removed and operations may be resumed some time.

The Greenwood Davis Coal Company, Duquoin, abandoned its mine March 16, 1907. The expense of handling the water and the haulage became so great that the mine was not on a paying basis. Water had to be pumped and the coal hauled up a 4 per cent grade.

April 1, 1907, the slope known as the Old Hallidayboro slope was abandoned.

#### PROSPECTIVE MINES.

The Dering Coal Company will open a new mine, to be known as No. 18, two and one-half miles northeast of West Frankfort, Franklin county.

The Benton Coal Company will open a new mine, to be designated as No. 2, one mile southeast of Benton.

The Big Muddy and Carterville Coal Company will have a new mine, to be

known as No. 2, at Royalton.

The Marion County Coal Company will have a new mine, two and one-

half miles northwest of Centralia.

The White Ash Coal Company is opening a new mine, four miles south

of Duquoin

The following is a detailed statement of the fatal accidents occurring in

this district during the year ended June 30, 1907:
August 2, 1906. Matt Watheau, shot firer, age 35 years, married, was killed

by a shot blowing through a pillar, while working in the Dering Coal Company's mine at West Frankfort. He leaves a widow and three children.

Sentember 19, 1906, Ezra Young, miner, age 60 years, married, was killed by falling clod in the Royal Coal and Coke Company's mine at Sparta. He leaves a widow.

October 11, 1906, John A. Hummel, miner, aged 33 years, married, was killed instantly at the face of his room by falling slate. He was drawing a pillar in the Paradise Coal Company's mine at Duquoin. He leaves a widow and two children.

October 11, 1906, Gus Lee, miner, aged 20 years, single, was killed instantly by falling slate. Lee and Hummel were working together drawing a pillar of a room in the Paradise Coal Company's mine, Duquoin, Ill.

December 11, 1906, Herman Habich, miner, aged 34 years, was killed instantly by falling rock and slate, the mass weighing about 2,000 pounds. He was employed in the Breese Trenton Mining Company's mine, Breese, He leaves a widow and two children.

December 22, 1906. A very deplorable accident occurred at the Breese Trenton Mining Company's mine at Breese, Clinton county, Saturday morning, December 22, 1906, whereby six men lost their lives when descending on the cage to their working places. All of the men were miners. The cage fell down the shaft 300 feet, killing all of the men almost instantly, breaking legs, arms and crushing their bodies horribly. The unfortunate men were:

August Foppe, miner, aged 32 years, married, leaving a widow and one

child.

Nay Middeke, aged 45 years, miner, married, leaving a widow and nine children.

Frank Zeherer, miner, aged 39 years, married, leaving a widow and three children.

New Holtmann, miner, age not given, married, leaving a widow and four children.

Walter Schaffner, miner, aged 30 years, married, leaving a widow and two

hildren

Herman Schleper, miner, aged 52 years, married, leaving a widow.

January 12, 1907, Louis Phillippi, miner, aged 29 years, married, was killed instantly while in the act of drilling out a shot, which he thought was a wet hole, as water was running out of the blasting barrel. This shot had been tamped the day before. Deceased was using a churn drill, which must have struck a piece of sulphur, igniting the powder. This accident occurred in the mine of the Duquoin Coal Company, Duquoin. He leaves a widow.

January 29, 1907, John H. Riordan, mine manager, aged 37 years, single, was cleaning up some coal with the intention of pulling slate down afterwards. However, the slate fell on him, with the result that he died from the injuries twelve hours afterwards. He was employed at the local mine

of John Anderson, Pinckneyville, Perry county.

February 12, 1907, William A. Stevenson, shot firer, employed in the mine of the Avery Coal Company, Winkle, Perry county, aged 53 years, married, was overcome with afterdamp caused from a blown out shot, the explosion tearing down all doors on that side of shaft and destroying the top of the air shaft. He leaves a widow and seven children.

February 12, 1907, William Haughland, shot firer, aged 50 years, married, was also overcome by afterdamp caused from the blown out shot described

as killing Stevenson. Deceased leaves a widow and two children.

April 27, 1907, Joshua Clark, aged 23 years, shot firer, married, was killed in the mine of the James Brothers Coal Company, Tilden, Randolph county. Deceased was returning to what he supposed was an unexploded shot, when it suddenly exploded with the result as stated. He leaves a widow and two children.

June 13, 1907, Bousilar Wevilkosky, trip rider, aged 21 years, single, employed at the Zeigler Coal Co's. mine, Zeigler, Franklin county, was killed. The power gave out, delaying his trip; when the power came on the motorman started the motor, at the same time he cautioned Wevilkosky about holding his head so high, but the trip rider did not heed the warning and

was struck by wire causing almost instant death.

June 19, 1907, Joseph Pemberton, top man, aged 31 years, married, was fatally injured while attempting to stop a moving railroad car with a pinch-bar, his foot caught under the bar when the wheels passed over his leg crushing it badly. The leg was amputated but death resulted June 23, 1907. He was employed at the Illinois Fuel Co's. mine, Sparta, and leaves a widow and six children.

June 19, 1907, Wm. P. Williams, miner, aged 63 years, married, was killed in mine No. 2 of Jones Bros. Coal Company near Marissa, Randolph county. Deceased was placing a prop under a piece of rock when it fell

killing him instantly. He leaves a widow and six children.

June 28, 1907, W. T. Hiser, mine examiner, aged 35 years, married, was killed by falling slate in the Missouri and Illinois Coal Company's No. 4 mine at Willisville. He leaves a widow and two children.

Following are the usual tables and schedules for each coal producing county in the Ninth inspection district.

Respectfully submitted,

W. S. BURRIS,

State Mine Inspector, Ninth District, Duquoin, Illinois.

#### TENTH INSPECTION DISTRICT-1907.

#### SECOND ANNUAL REPORT.

Counties—Gallatin, Jackson, Johnson, Saline, Williamson.

THOMAS LITTLE, Inspector, Murphysboro.

HON. DAVID ROSS.

Secretary State Bureau of Labor Statistics, Springfield, Ill.

Sir—In compliance with the statute of the State, defining the duties of the State inspectors of coal mines, I herewith submit the second annual report of the coal mines in the tenth inspection district for the year ended June 30, 1907.

A tabular statement is herewith given of the statistics in each county, showing the number of mines operated during the year, both shipping and local; the new and abandoned mines; the depth of coal below the surface, with the geological number and thickness of the various coal seams; the number of miners and other employés working in the mines and on the surface; the total tonnage of all grades of coal; the average value of coal at the mines and the aggregate value of the total product in the district, with the casualties occurring in and around the mines, both fatal and non-fatal

The following summary is given as a recapitulation of the principal facts found in the schedules of the various counties:

Number of counties in which coal is produced	5
Total number of mines	100
Number of new mines: shipping, 6; local 6	12
Number of mines abandoned	9
Number of local mines	38
Total tonnage of shipping mines	7;698.816
Total tonnage of local mines	76,632
Total tonnage all mines	7.775.448
Tons loaded on cars for shipment	6,980,567
Tons supplied to locomotives	106,755
Tons sold to local trade	153,007
Tons consumed and wasted at the mines	535,119
Aggregate value of the total product	\$7,452,954
Number of miners in all the mines	5.617
Number of other employes and boys underground	
Number of employes above ground	1,132
Total number of employés	9,121
Average number of days in active operation shipping	202
Number of mines using machines	28
Number of machines in use	227
Tons cut by machine	2,988,372
Tons mined by hand	4,787,076
Number of fatal accidents	29
Number of non-fatal accidents	47
Number of wives made widows	14

Number of children made fatherless	30
Number of tons produced for each fatal accident	268.119
Number of tons produced for each fact actions.	165.435
Number of persons employed to each fatal accident	319
Number of persons employed to each non-fatal accident	194
Ratio of fatal accidents per 1,000 persons employed	3.2

The following shows the coal reported by counties with increase and decrease in each for the year ending June 30, 1906 and June 30, 1907:

COUNTIES.	TOTAL PRODU GRADES OF TON	Coal, in	Decrease.	Increase.	
	1906	1907			
Williamson	3, 927, 189	5, 166, 452		1, 339 . 263	
Saline	601.979	1, 711, 825		1, 109, 846	
Jackson	7, 59962	705, 363	54, 599		
Gallatin	99, 860	88,908	10,952		
Johnson	912	2, 900		1, 988	
Totals	5, 389, 902	7, 775, 448	65, 551	2, 451, 097	
Net increase				2,185,546	

#### NEW MINES.

The Davenport Coal Company in Saline county, has sunk a new mine, which is known as shaft "B"; coal was reached December 20, 1906, at a depth of 97 feet. The shaft is 91/2 by 151/2 feet in the clear; the coal is

the No. 5 seam and is 6½ feet thick.

The tipple is made of heavy steel and is 60 feet high with self-dumping cages and shaker screens of the Bond make; it is equipped with a pair of first motion engines, 18 by 34 inches, made by Keck-Gonnerman, Mt. Vernon, Ind.; the drum is 4½ feet in diameter; the rope is 1¼ inches; there are four boilers made by the Atlas Engine Works, Indianapolis, Ind. The boilers are 20 feet by 72 inches with 72 four-inch flues. The shaker screen has a 10 by 16 inch engine, the screen is run by a rope drive. The escapement shaft is 91/2 by 151/2 feet. The fan is 16 feet in diameter, Crawford-McCrimmon make run by a 16 by 16 engine.

The engine room of the main shaft is 24 by 30 feet; the boiler room

50 by 48 feet; both are built of brick, with steel bridge roofs.

The generator room is 24 by 45 feet also built of brick. A Goodman generator has been installed, 150 K. W. and 250 volts; the generator is driven by a Ridgeway engine, 18 by 19 inches. The blacksmith shop is 29 by 47 feet, covered with galvanized iron; the fan house is 32 by 221/2 feet; the powder house is 16 by 16 feet, both built of brick. This is one of the best equipped mines in the county.

The Wasson Coal Compank, in Saline county, has sunk a new mine, 31/2 miles south of Eldorado on the Big Four railroad; coal was reached January 20, 1906, at a depth of 320 feet; the shaft is 9 by 14 feet; the coal is

5 feet thick and is the No. 5 seam.

The equipment consists of a pair of first motion engines 20 by 36 inches, made by Keck-Gonnerman, Mt. Vernon, Ind.; the drum is 6 feet, and the rope 1¼ inches; there are two boilers, 72 inches by 18 feet with 70 four-inch flues of the Keck-Gonnerman make. The engine room is 44 by 40 feet; the boiler room 48 by 40 feet, both are covered with galvanized iron. head frame is built with long leaf yellow pine lumber and equipped with self dumping cages; there are four tracks and a shaker screen which makes four grades of coal. The air shaft is 9 by 12 feet with a 16 foot fan installed. This shaft is an up-to-date plant, and is equipped for a large output. The Gus Blair Big Muddy Coal Company, Jackson county, has sunk a new mine at Murphysboro. The mine was sunk in 1906 and coal was reached August 17, at a depth of 120 feet. The shaft is 12 by 18 feet; the coal is No. 1 and No. 2 seams. The engines are 12 by 18 geared 3 to 1, with one inch rope and 5 foot sheave wheels. The boiler is 72 inches by 20 feet with 25 six inch flues. The company intends working the coal by punching machines, as they have a New York Air Compressor; the capacity of the compressor is ten machines. The head-frame is 50 feet high built with long leaf yellow pine; having a shaker screen. The engine room is 22 by 45 feet covered with galvanized iron; the office 12 by 14 feet; the blacksmith shop 18 by 20 feet; both covered with galvanized iron. This shaft is located 2½ miles north of Murphysboro, on the Iron Mountain railroad, and is an up-to-date shaft for the size of it.

Several new mines have been opened in Williamson county. The Scranton & Big Muddy Coal Mining Company has sunk a new shaft 3 miles northeast of Marion. This shaft struck coal at a depth of 184 feet; the coal is 8 feet thick. The heighth of the tower is 75 feet; the upright timbers are 12 inches by 12 feet yellow pine and white oak; the buntons are 12 by 12; white oak braces, 6 by 8 and the guides 4 by 6; the sheave wheels are 6 feet in diameter and are from the Aetna Foundry & Machine Co., Springfield, Illinois.

The length of the shaker screen room is 77 feet, the size of timbers are  $10~\mathrm{by}~10$  inches and  $12~\mathrm{by}~12$  inches yellow pine, with white oak braces  $6~\mathrm{by}~8$  inches.

The shaker screens are in length 62 feet by 8 feet wide and are in two sections, each 31 feet long; the shaker engine is direct to the screens, size 8. by 14. One five-ton weighing hopper is used with Fairbanks & Morse scales. The screens and engine also the hopper are of the Blakeslee make. The size of the engine house is 29 by 36 feet; the hoisting engine is Aetna make, 20 by 36 with two drums; an Ingersoll-Rand compressor is installed, the steam cylinders being 22 by 24 inches, and air 24 by 24 inches; the size of the boiler room is 45 by 24 feet; there are two Atlas boilers 72 inches by 18 feet with 70 flues, 150 H. P. each with a Gardner feed pump 6 by 4 by 6 inches. A National single pump, size 9 by 5½ by 10 inches, a Blakeslee 7 duplex pump 19 by 6 by 10 inches. The fan is a Blakeslee 5 by 4 feet with a 10 by 16 inch incline engine; this is not erected yet. This shaft is 9 by 16 feet inside of timbers and has two feet partitioned off at the end for pipes. The shaft is built for a capacity of two thousand tons a day.

The Chicago & Carterville Coal Company has opened and equipped a new mine about two miles northeast of Herrin, on the C. B. & Q. railroad. The sinking of the hoisting shaft was begun in August, 1905, but owing to many difficulties encountered in the way of mud, quicksand and water, the coal was not reached until October 1906; the depth of the shaft is 236 feet to a seam of coal 9 to 10 feet in thickness. This mine is equipped with a wood tower covered with galvanized iron; the engine house is of brick; having double hoisting engines with 20 by 36 inch cylinders, and conical drums 5½ by 7 feet; two boilers are installed each 6 by 20 feet, provided with automatic stokers. All other necessary buildings and machinery are supplied to make a first class up-to-date plant.

The air and escapement shaft was completed in March, 1907, and is provided with a 10 foot steel, high speed ventilating fan of the Murphy type, manufactured by the Sullivan Machinery Company.

#### Abandoned Mines.

There have been really no shipping mines abandoned during the year, however, the Carterville Coal Company, Carterville, has not operated its shafts A and B during the year; the company claiming that these have not been abandoned. The Hemlock Coal Company, Herrin, and the Lake Creek Coal Company, Johnston City, have not shipped any coal this year on account of not having any railroad tracks laid to their mines.

#### IMPROVEMENTS.

The following is a list of electrical equipments installed at the several mines of the O'Gara Coal Company, in Saline county, at No. 7 mine: One 250 h. p. Erie engine 19 by 18; one K. W. Morgan-Gardner generator; one 6 by 18 tubular boiler, Union Iron Works' make; five Morgan-Gardner electric machines. At No. 9 mine, one 19 by 18 Erie engine; 150 K. W. Morgan-Gardner generator; one tubular boiler 6 by 18, Union Iron Works' make; six Morgan-Gardner electric machines. At No. 4 mine; siz Morgan-Gardner electric machines; one 712 ton haulage motor, Morgan-Gardner make; one tubular boiler 6 by 18 Union Iron Works make. At No. 3 mine, three 19 by 18 Erie engines; three 150 K. W. Morgan-Gardner generators; six Morgan-Gardner chain machines; three Union Iron Works' tubular boilers, 6 by 18; one Platt Iron Works' heater. At No. 2 mine, four Morgan-Gardner electric chain machines. The electric power for mines 2, 3, and 4 is supplied from No. 3 mine. At No. 11 mine, two 19 by 18 Erie engines; two 150 K. W. Morgan-Gardner generators; three Morgan-Gardner chain machines; three tabular boilers 6 by 18, Union from Works' make; one pair direct acting hoisting engines, 20 by 36, Litchfield make. The electric power for mines 8 and 10 is supplied from this mine. At No. 19 mine, five Morgan-Gardner chain machines; one Morgan-Gardner 5 ton haulage motor. At No. 8 mine, four Morgan-Gardner chain machines; one Morgan-Gardner 5 ton haulage motor.

The Carterville District Coal Company, Marion, has installed a main rope and tail rope system of haulage, which has greatly increased their output.

#### CHANGING IN THE NAMES OF COMPANIES.

The Davenport Coal Company, of Harrisburg, has changed its name to the Saline Coal Company.

#### FATAL ACCIDENTS.

July 7, 1906, Elmer Voorhees, carpenter, aged 28 years, married, employed at the Big Muddy Coal & Iron Company, shaft No. 9, was killed by a gin pole falling on him. He leaves a widow and one child.

July 14, 1906, Harvey Dunning, miner, aged 24 years, single, employed at the O'Gara Coal Company's mine No. 6, located two miles south of Harrisburg, was killed by falling rock in room No. 4, third east entry off of the north. The rock was 20 feet long, 12 feet wide and about 5 feet thick at the thickest place. Instructions had been given by the mine manager about one hour before the accident to set props under the roof; deceased promised to do so, but failed to do as instructed.

July 14, 1906, E. Lands, miner, aged 22 years, single, employed at the O'Gara Coal Company's shaft No. 6, two miles south of Harrisburg, was working in the room with Harvey Duning and was killed by the same rock.

August 17, 1906, Bromo Yarreffa, bottom laborer, aged 23 years, single, employed by the Western Coal & Mining Company, was killed instantly by falling slate; the piece falling on him was about two by three feet long and eight inches thick.

August 29, 1906, Angelo Correll, miner, aged 32 years, married, employed by the Carterville District Coal Company, was instantly killed. The cage had his usual number of men on the cage and rang for the engineer to hoist: just as the cage was leaving the bottom, the deceased came running past those who were waiting for the next cage to come out, and leaped on the cage; he was caught between the cage and the casing of the shaft, crushing his head. He leaves a widow and three children.

September 6, 1906, Harry Hall, miner, aged 39, married, employed by the Lake Creek Coal Company, was fatally burned. His death was caused by the ignition of gas in the entry where he was engaged in cutting down a standing shot; the fall caused a draft that brought the gas down on the light, which was setting on the ground. He was burned so severely that he died three days afterwards. He leaves a widow and two children

September 11, 1906, Robert Gray, driver, aged 20 years, single, employed at the mine of the Chicago & Carbondale Coal Company, was riding in front of a car on the tail chain and fell off, the car running over him, injuring

him fatally. He died three hours afterwards.

September 19, 1906, Gus Smith, top laborer, aged 20 years, single, employed by the Big Muddy Coal & Iron Company, at its shaft No. 7, was riding on top of a loaded box car, which he was taking to the yard; his brother Fred threw him a bar to use in setting the brake, when he went to tighten the brake rod the bar slipped causing him to lose his balance, when he fell across the rail; the car passing over him cutting him in two.

October 25, 1906, Allen Henson, timberman helper, aged 25 years, single, employed by the Sunnyside Coal Company, was cutting a hitch for cross bars, when a piece of slate fell, striking him on the shoulders, kno king him down; he arose to his feet, saying to his partner, he was not hurt, when another piece suddenly fell on him crushing his head and breast. accident happened on the third north entry on the east side of mine No. 4.

October 27, 1906, Richard Spezia, miner, aged 30 years, married, employed by the Chicago & Carterville Coal Company at mine "A", was killed by an explosion of fire damp in the first east entry on south side of the shaft.

leaves a widow and two children.

October 27, 1906, Peter Brennar, pumpman, aged 54 years, married, employed by the Chicago & Carterville Coal Company, at mine "A," was killed by an explosion of fire damp in the first east entry on south side of shaft.

He leaves a widow and six children.

November 3, 1906, Joseph Smith, miner, aged 60 years, married, employed at Joe Ingram's mine, one mile south of Harrisburg, was killed instantly by a piece of slate 7 by 15 by 16 feet falling on him. He leaves a widow and one grown son.

November 14, 1906, Richard Lee, trapper, aged 16 years, single, employed by the Big Muddy Coal & Iron Company at mine No. 6, was killed while coming up on a cage; at about 50 feet from the bottom he lost his balance from some unknown cause and fell from the cage to the bottom of the shaft.

December 3, 1906, N. J. Massey, top foreman, aged 35 years, married, employed by the O'Gara Coal Company at mine No. 8, was fatally injured. The car on the cage had become unlocked and stopped at the top landing; Massey and others had put the car on the track and were trying to move the car so they could latch it again when they lost control of the car and it ran off the cage into the weighing hopper, catching Massey between the car and the floor sills, fracturing his skull and injuring him otherwise; the accident occurred at 2:00 p. m. and he died eight hours afterwards. He leaves a widow and three children.

December 17, 1906, Walter Gilbert, miner, aged 25 years, married, employed by the Inland Coal & Washing Company, was instantly killed. indications are that the deceased was sitting on a rail, sharpening a drill bit, when a standing shot fell on him. The room in which he was working was found to be in good condition and the roof was intact; he was found about 12:20 p. m., by pumpman James Griffin, who was making his usual rounds and was attracted to the room by hearing groans which came from his brother. Lawrence Gilbert, who was fatally injured by the same accident.

Walter Gilbert leaves a widow and three children.

December 17, 1906, Lawrence Gilbert, miner, aged 17 years, single, employed by the Inland Coal & Washing Company, was fatally injured. This accident was not witnessed by any one; deceased was working in a room with his brother Walter, who was instantly killed. Lawrence was found by the pumpman who had been attracted to his room by hearing his groans; he was found to be badly injured, his skull and face being crushed; he was taken to the top but died in about 15 minutes. Indications show that he was in the act of setting a drill when a standing shot fell, crushing him. room and roof were in safe working conditions.

December 17, 1906, Claude Miner, miner, aged 17 years, single, employed by the National Mining Company, at Eldorado, was killed instantly by falling slate at the face of his room, which fractured his skull over the right eye, breaking his neck and badly lacerating the scalp.

December 22, 1906, John Willis, trapper, aged 66 years, married, employed at mine No. 3 of the Peabody Coal Company, near Marlon, was trapping the main east door; the motor started from the third south parting with 12 loaded cars; the last three cars of the trip became uncoupled between the parting and the door; when the trapper saw the motor trip going past him, he stepped into the middle of the track and the three cars that had been uncoupled struck him, the first one ran over him and he was found dead under the second car. He leaves a widow and five children.

the second car. He leaves a widow and five children.

December 29, 1906, Frank Nelson, pumpman, aged 23 years, single, employed at the Madison Coal Company, No. 9 mine, was killed by being caught

in the cog wheels of an electric pump.

January 18, 1907 Oliver P. Draper, mine examiner, aged 25 years, married, employed at the O'Gara Coal Company No. 1 mine, near Harrisburg, met his death while examining the mine at 5:30 a. m. This accident occurred at the face of the second east entry on the north side of the shaft; it is believed that he fired the gas with a naked light and that death was due to after damp. He leaves a widow.

The seven following accidents were caused by the explosion of thirty kegs of powder in the mine of the Johnson City & Big Muddy Coal & Mining Company, located at Johnston City, Williamson county, at about 11:30 a.m.,

January 29, 1907.

The practice of handling powder and delivering it at the mine was as follows: The miners order the powder at the office, these orders are given to the teamster, who hauls the powder from the powder house and delivers it at the top of the shaft; the powder is then loaded into a mine car and sent down the shaft; from the bottom of the shaft the powder is taken north 120 feet where the main east and west entries are turned off of the north entry. Three men were employed at the time of the explosion, unloading the powder from the mine car and placing it north of the tracks for distribution; one of these men was in the car handing the powder to another man outside of the car; this man then passed the kegs to the third man to be placed where the different drivers would get the powder, at this ponit, and take it into the miners who had ordered powder for that day. I am of the opinion that the explosion was due to the rough handling of the kegs of powder when taken from the mine car and to where the powder is placed, which is 12 feet from the car and 6 feet 6 inches from the north rail. There was no coal dust nor fire damp near the point of the explosion; Frank Meagher was handing the kegs of powder out of the car to Jess Davis. Davis in turns handing the kegs to Martin Lawry, who was placing them in the place as described.

Following are the names, ages, occupation, etc., of the seven men:

George Patterson, bottom laborer, aged 26 years, single, living at Johnston City, died at 11:00 p. m., January 30, 1907.

Martin Lawry, driver, aged 25 years, married, living at Johnston City, died at 10:00 p. m., January 29, 1907 and leaves a widow and one child.

Jess Davis, driver, aged 25 years, married, living at Johnston City, died at 3:30 p. m., January 29, 1907 and leaves a widow and one child.

Romulus Fenrenboker, driver, aged 20 years, single, living at Johnston

City, was instantly killed.

Claus Morse, cager, aged 46 years, widower, living at Galatia, died Jan-

uary 31, 1907, leaving one child.

Phelix Toner, bottom laborer, aged 27 years, married, living at Murphysboro, died at 9:00 p. m., January 29, 1907 and leaves a widow and one child. Frank Meager, flagman, aged 17 years, single, living at Johnston City, died

at 4:00 p. m., January 29, 1907.

May 27, 1907. Richard D. Lewis, miner, aged 46 years, single and employed by the Carterville & Big Muddy Coal Company, was working in room No. 2 east entry on the north side of the shaft. About 3:30 p. m., he was supposed to be preparing a shot when a piece of slate fell from the roof, striking him on the back of the head, killing him instantly; the piece of slate was about 3 by 4 feet in size and two inches thick. This was a draw piece of slate, and the deceased was warned about it in the morning and told to take it down, and said he would but neglected to do so, when it fell upon him.

June 26, 1907, Charles Taylor, machine runner, aged 26 years, single, employed at the O'Gara Coal Company No. 3 mine at Harrisburg, was engaged in shoveling cuttings from the machine, when a piece of slate 15 by 12 inches, three feet thick fell, crushing him. He died about four hours after the accident. The tables of accidents and the county tables follow:

Respectfully submitted, THOMAS LITTLE,

State Inspector of Mines, Tenth District, Murphysboro, Illinois.

Bureau of Labor Statistics and Miners' Examining Board Law.

Register of Certificated Mine Managers, Hoisting Engineers, Mine Examiners.

NINTH ANNUAL REPORT ILLINOIS FREE EMPLOYMENT OFFICES.

#### BUREAU OF LABOR STATISTICS.

An Act to create a Bureau of Labor Statistics, and to provide for a Board of Commissioners and Secretary.

Section I. Be it enacted by the People of the State of Illinois, represented in the General Assembly: That it shall be the duty of the Governor, with the advice and consent of the Senate, to appoint a board of commissioners of labor, to consist of five members, who shall hold office for two years, three of whom shall be manual laborers, the remaining members of the commission shall be manufacturers or employers of labor, in some productive industry, and they shall meet annually on the first Monday in September at the State capital, when they shall organize by electing a president from among themselves and appointing a secretary, who shall hold office for a term of two years or until his successor is appointed; the said secretary to have no voice in the deliberations of said board nor to be selected from the said commissioners.

§ 2. The duties of such board shall be to collect, assort, systematize and present in biennial report to the General Assembly, statistical details relating to all departments of labor in the State, especially in its relations to the commercial, industrial, social, educational and sanitary conditions of the laboring classes, and to the permanent prosperity of the mechanical, manufacturing and productive industry of the State.

It shall be the duty of every employer of labor in this State to afford to the State Commissioners of Labor or their representatives every facility for procuring statistics of the wages and conditions of their employés for the purpose of compiling and publishing statistics of labor and of social and industrial conditions within the State as required by law. Any person who shall hinder or obstruct the investigation of the agents of the commissioners or shall neglect or refuse, for a period of ten days to furnish the information called for by the schedules of the commissioners as provided above, shall be adjudged guilty of a misdemeanor and be subjected to a fine of one hundred dollars.

Section 2 amended and approved June 1, 1908.

§ 3. The compensation of said commissioners shall be \$5.00 per day for thirty (30) days of each annual session, and the compensation of said secretary shall be twenty-five hundred dollars (\$2,500.00) per annum. The amount accruing to said commissioners to be paid to

them at the expiration of their said annual session of thirty days, and the Auditor of Public Accounts being hereby authorized to issue his warrant on the treasury in their favor for the amount specified in this section, and the secretary shall be paid quarterly in the same manner. The Auditor is further directed and authorized to draw his warrant for the actual traveling, incidental and office expenses of said commissioners and their secretary on their vouchers sworn to by them, and approved by the president of the board and the Governor.

Approved May 29, 1879, in force July 1, 1879. Amended and approved May 15, 1903. Amended and approved June 1, 1908.

#### MINERS' EXAMINING BOARD.

§ 1. Miners to obtain certificates of com-

petency—exemptions.

§ 2. Miners' Examining Board—appointment — organization — compensation, etc. § 3. Meeting place-notice-book of reg-

istration.

§ 4. Examination fee-report, etc.

§ 5. Time of meeting-examination of applicants—record of proceedings, etc.

§ 6. Violations—penalty.
Complaints — investigations—prosecutions, etc. § 7.

§ 8. Administration of oath.

§ 9. Repeal.

(SENATE BILL No. 213. APPROVED JUNE 1, 1908.)

An Act to provide for the safety of persons employed in and about coal mines and to provide for the examination of persons seeking employment as coal miners, and to prevent the employment of incompetent persons as miners, and providing penalties for the violation of the same.

Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly: That hereafter no person whosoever shall be employed or engaged as a miner in any coal mine in this State without having obtained a certificate of competency and qualification so to do from a "Miners' Examining Board" of some county of this State, except that any miner employed in the State when this Act becomes effective, who has been employed at least two years in the coal mines, shall be entitled to a certificate permitting him to work in the mines of this State as a practical miner: Provided, that the above provisions shall not prevent the employment of persons not having such certificate who are employed or engaged to work with or under the direction of a miner having such certificate, for the purpose of becoming qualified to receive such certificate under the provisions of this Act.

§ 2. In each county of the State where the business of coal mining is carried on, there shall be created a board to be styled the "Miners' Examining Board," to consist of three miners who shall be appointed by the circuit judges of the judicial district in which such county shall lie; such appointment to be made immediately after this Act shall go into effect, and annually thereafter at the first term of court in each year, all vacancies to be filled by such judges as they occur; and the members of such boards shall be experienced and skillful miners actually engaged in said business in their respective districts.

Each of said boards shall organize by electing one of the members president, and one member secretary; and every member of said board shall, within ten days after his appointment, take and subscribe an oath or affirmation before a properly qualified officer of the county in which he resides, that he will honestly and impartially discharge his official duties.

Members of said board shall receive as compensation for their services three 50-100 dollars (\$3.50) per day for each day actually engaged in their official duties, and all legitimate and necessary expenses incurred in attending the meetings of said board under the provisions of this Act, and no part of the salary of the said boards, or the ex-

penses thereof shall be paid out of the State treasury.

§ 3. Each of said examining boards shall designate some convenient meeting place in their respective counties, of which due notice shall be given by advertisement in two or more newspapers of the proper county. At such meeting a book of registration shall be open in which shall be registered the name and address of each and every person to whom they have issued certificates of competency under this Act.

§ 4. Each applicant for examination for the certificate herein provided, shall pay a fee of one dollar, and the amount derived from this source shall be held by said boards and applied to the expense and salaries herein provided and such as may arise under the provisions of this Act. The said boards shall report in writing annually to the court appointing them and to the State inspectors of mines, all moneys received and disbursed under the provisions of this Act, together with the number of miners examined under this Act and the number fail-

ing to pass the required examination.

§ 5. It shall be the duty of said boards to meet on the first Wednesday of each month, but when said day falls on a legal holiday then the day following, and said meeting shall be public, and if necessary, the meeting shall be continued to cover whatever portion may be required of a period of three days in succession, or for the first session of the respective boards hereunder such longer period as may be required to examine all applicants for examination presenting themselves, and examine under oath all persons who desire to be employed as miners in the respective counties; and said board shall grant such persons as may be qualified, certificates of competency or qualification which shall entitle the holders thereof to be employed as and to do the work of miners as may be expressed in said certificate and such certificate shall be good and sufficient evidence without an examination in any other county of the State of competency under this Act.

Every person applying for a certificate of competency, or to entitle him to be employed as a miner must produce evidence of having had not less than two years of practical experience as a miner or with a miner, and in no case shall an applicant be deemed competent unless he appear in person before the said board and orally answer intelligently and correctly at least twelve practical questions propounded to him by said board pertaining to the requirements of a practical miner. The said board shall keep an accurate record of the proceedings of their meetings and in said record shall show a correct detailed account of the examination of each applicant with questions asked and their answers

and at each of these meetings the board shall keep said record open for public inspection. Any miners' certificate granted under the provisions of this Act shall not be transferable, and any transfers of the same shall be deemed a violation of this Act. Such certificates shall be issued only at meetings of said boards, and said certificates shall not be legal unless then and there signed by at least two members of such board.

- § 6. That no person shall hereafter engage as a miner in any coal mine without having obtained such certificate as aforesaid. And no person shall employ any person as a miner who does not hold such certificate as aforesaid, and no mine foreman or superintendent shall permit or suffer any person to be employed under him, or in the mines under his charge and supervision as a miner, who does not hold such certificate. Any person or persons who shall violate or fail to comply with the provisions of this Act shall be guilty of a misdemeanor, and on conviction thereof shall be sentenced to pay a fine of not less than one hundred dollars and not to exceed five hundred dollars, or shall undergo imprisonment in the county jail for a term of not less than thirty days and not to exceed six months, or either, or both, at the discretion of the court.
- § 7. It shall be the duty of the several miners' examining boards to investigate all complaints or charges of non-compliance or violation of the provisions of this Act, and to prosecute all persons so offending; and it shall be the duty of the prosecuting attorney of the judicial district wherein the complaints or charges are made to investigate the same and prosecute all persons so offending, and it shall at all times be the duty of such prosecuting attorney to prosecute such members of the Miners' Examining Board as have failed to perform their duty under the provisions of this Act. Upon conviction of any member of the Miners' Examining Board for any violation of this Act, in addition to the penalties herein provided, his office shall be declared vacant, and he shall be deemed ineligible to act as a member of the said board.

§ 8. For the purpose of this Act the members of the said Miners'

Examining Board shall have the power to administer oaths.

§ 9. An Act entitled "An Act in relation to the safety and competency of coal miners, and to punish for infraction of same," approved June 7, 1897, in force July 1, 1897, is hereby repealed.

Approved June 1, 1908.

# MINE MANAGERS HOLDING CERTIFICATES OF COMPETENCY.

Note—This list includes all the mine managers to whom certificates have been issued prior to January 1, 1908.

The names which are printed in italic are those who hold both certificates of service and subsequent certificates of competency acquired through examination.

The names which are followed by the abbreviation "ex." are those who have exchanged certificates of service for those of competency, without examination, under the provisions of the amendment of 1895. Names followed by the letter "d" are deceased.

The postoffice addresses here given, and in all the lists following, are those recorded at the time the certificates were issued, and in many cases are not the present addresses of the certificate holders.

# MINE EXAMINERS HOLDING CERTIFICATES OF COMPETENCY.

The revised mining law of 1899 changed the title or name "Fire Boss" to that of "Mine Examiner," and provided that those holding certificates as Fire Boss could exchange the same for that of Mine Examiner.

The names followed by the abbreviation "ex," have made such exchange;

The names followed by the abbreviation "ex," have made such exchange; those by "d" are deceased. The list includes all Mine Examiners to whom certificates have been issued prior to January 1, 1908.

#### NINTH ANNUAL REPORT

OF THE

## Bureau of Labor Statistics

OF THE

# Illinois Free Employment Offices

FOR THE

YEAR ENDED OCTOBER 1, 1907.

[Established August 2, 1899]

DAVID ROSS, Secretary, Springfield.

SPRINGFIELD, ILL.
PHILLIPS BROS., STATE PRINTERS.
1908.

## NINTH ANNUAL REPORT OF THE ILLINOIS FREE EMPLOYMENT OFFICE.

FOR THE YEAR ENDING SEPT. 30, 1907.

[Established in 1899.]

This is the ninth annual report of the Illinois Free Employment Offices, and is for the year ending Sept. 30, 1907. Three of these offices are located in Chicago and one in Peoria. Another office has been established in East St. Louis, which was opened for business Oct. 1, 1907. From the weekly reports received of the work accomplished by this office for the first three months, fully confirms the wisdom of establishing an office in that city. There are now five free employment offices in the State.

Table I presents a summary of the combined work of the four offices during the past year. The number registering, seeking employment, during the year was 59,631, this is only three per cent of an increase over last year; the number of employés registering for help was

65,872, being an increase of 8 per cent over last year.

The number of persons for whom positions were secured was 55,417;

this is nearly 4 per cent more than for last year.

From the note at the foot of the table it will be seen that 329 persons given positions, had previously registered for employment, adding this number to the number registered during the year, it is found that for the whole number 92.7 per cent were given positions, thus supplying 84.1 per cent of the employers with the help sought for. No record is kept of any duplications of registering for employment or help, nor for positions secured.

Table 1—Showing the Combined Business of the Four Offices for the Year Ending Oct. 1, 1007.

		PPLICATION EMPLOYM	APPLICATIONS FOR HELP.		
OFFICES. (Three in Chicago, one in Peoria.)	Number filed.	Number positions secured.	Number unfilled.	Number filed.	Number unfilled.
North Side Office—Males North Side Office—Females	6, 703 4, 060	6,644 4,003	59 57	6, 862 4, 991	218 988
Both sexes	10, 763	*10.647	116	11, 853	1, 206
South Side Office—Males	15, 126 3, 627	14, 353 3, 627	773	17, 137 6, 177	2, 784 2, 550
Both sexes	18, 753	17, 980	773	23, 314	5, 334
West Side Office—Males	14, 660 3, 922	13,000 3,205	1, 660 717	14, 121 4, 399	1, 121 1, 194
Both sexes	18,582	16, 205	2, 377	18. 520	2, 315
Peoria Office—Males Peoria Office—Females	8, 711 2, 552	8, 308 2, 277	403 275	9, 158 3, 027	850 750
Both sexes	11, 263	†10, 585	678	12.185	1,600
Total Males—Four Offices Total Females—Four Offices	45, 200 14, 161	42, 305 13, 112	2, 895 1, 049	47, 278 18, 594	4, 973 5, 482
Both sexes	59, 361	\$55,417	3, 944	65, 872	10, 455

<sup>\*</sup> Of this number 118 males and 161 females, a total of 279 were secured positions on applications filed last year.

These offices were opened and doing business 305 days during the year. Taking the whole number of persons served, it is found that an average of 48 persons registered for employment in each office every day and an average of 54 employers registered as wanting help; while an average of 46 persons were placed in positions of employment, thus making an average of 148 persons served at each office every working day during the year.

The expense to the State to maintain these offices for the past year was \$31.571; this sum is, of course, exclusive of the cost of equipment. The aggregate number of positions secured was 55,417, making a per

capita cost of 57 cents.

<sup>†</sup> Of this number 39 males and 11 females, a total of 50 were secured positions on applications filed last year.

tions filed last year.

† Of this number 157 males and 172 females, a total of 329 were secured positions on applications filed last year.

Table 2 presents the cost of maintaining each of the four offices; showing the average cost per day for the 305 working days; the whole number of positions secured by each office; the average number secured by each office each working day, and the average cost per capita for positions secured.

TABLE 2—Cost for Maintaining Offices; Average Cost Per Day, Positions Secured and Cost Per Capita for Same.

Offices.	Cost of maintenance.	Average cost per day.	Number of positions secured.	Average number secured each day.	Cost per capita.
North Side Office	\$8,382 00	\$27 48	10, 647	35	\$0 79
South Side Office	9, 186 00	30 12	17, 980	59	51
West Side Office	7,962 00	26 10	16, 205	53	49
Peoria Office	6,041 00	19 81	10, 585	35	57
The four offices	\$31,571 00	\$103 51	55, 417	182	<b>\$0 57</b>

The cost of maintaining the different offices varies somewhat in amount but the best possible estimate is made based on the prospective work anticipated to be accomplished.

Table 3 presents the percentages of the total fund appropriated for each office, which includes salaries of officials, clerks, etc., and running expenses; also the percentage of positions secured by each office with the cost per capita.

The south side office in Chicago expended the larger per cent of the maintenance fund but procured the largest per cent of positions; the per capita cost for positions secured was 51 cents, which is 6 cents less than the average for the State. The west side office shows a per capita cost of 49 cents; the north side office 79 cents and the Peoria office 57 cents.

Table 3—Percentages of Maintenance Fund and Positions Secured, also Cost per Capita.

	PERCENT	D	
Offices.	Mainte- nance.	Positions secured.	Per capita.
North Side Office	26.6	19.2	\$0 79
South Side Office	29.1	32.5	51
West Side Office	25.2	29.2	49
Peoria Office	19.1	19.1	57

Table 4 shows by percentages the record for the year as presented in Table 1. That is to say, these percentages show for each office, and for all the offices, the proportion of both sexes applying for employment, wanted as help and positions secured.

The last line of the table shows that for both sexes all applicants for employment and all applications for help and for all positions secured, the divisions were nearly equal, being three-fourths for males

and one-fourth for females.

Table 4—Percentages of Applicants for Employment and for Help, and Positions Secured for Males and Females by Each Office and by the Four Offices for the Year 1907.

	Percentages of—								
Offices.	APPLICATIONS FOR EMPLOYMENT.		APPLICATIONS FOR HELP.		POSITIONS SECURED.				
	Males.	Females.	Males.	Females.	Males.	Females.			
North Side Office	62.28	37.72	57.89	42.11	62.40	37.60			
South Side Office	80.66	19.34	73.51	26.49	79.83	20.17			
West Side Office	78.89	21.11	76.25	23.75	80,22	19.78			
Peoria Office	77.34	22.66	75.16	24.84	78.49	21.51			
The four offices	76.14	23,86	71.77	28.23	76.34	23.66			

Table 5 shows for each office the percentages of positions secured to applicants for employment, and to employers as applicants for help, for each sex and for both sexes.

The north side office shows the highest proportion of positions secured for males, while the south side office has credit for giving every

female applicant a position.

For positions secured to applicants of both sexes the range is from 87.2 per cent at the west side office to 98.9 per cent at the north side office, while for all the offices 93.4 per cent were placed in positions.

On the other hand, applications of employers for help were well served, the four offices furnishing 89.49 per cent of the applications for males and 70.51 per cent for females, or 84.11 per cent for both sexes.

Table 5—Percentages of Positions Secured and Percentages of Help Furnished both Male and Female.

#### RECORD FOR EIGHT YEARS BY CLASSIFIED OCCUPATIONS FOR MALES.

Table 6 presents the work accomplished by the four offices for male employment during the past eight years. The first line at the head of the table shows that, during these eight years, 238,419 men or boys applied to our free employment offices for positions of some kind wherein they might obtain a livelihood; of this number 200.848 or 88 per cent were placed in positions. During the same period 231,563 employers registered as desirous of obtaining help, and, from the number seeking employment, 90.62 per cent of the demand was supplied.

The classification of the occupations here shown is designed to show the character of employment which can be supplied and for which

demand is made.

RECORD FOR EIGHT YEARS, CLASSIFIED OCCUPATIONS FOR FEMALES.

Table 7 is a similar showing for female applicants for work and a

corresponding demand for their services.

The first line at the head of this table shows that 111,903 applied for employment, and that 133,635 registered as wanting help, of the number seeking work 92.84 per cent were placed in positions thus supplying 77.74 per cent of those seeking help in these different classes of occupations.

#### Applications for Employment and Positions Secured.

Table 8 presents, in whole numbers and condensed form those portions of Tables 6 and 7 relating to applications for employment and positions secured. The first three columns of the table gives for each year, the whole numbers of each sex applying for employment, and the last three columns the number for whom positions were secured. The last line of the first three columns of the latter shows that a total of 365,727 persons, both sexes, applied at the four offices for employment during the past eight years; this is an average of 45,716 for each year. Of the whole number 68.34 per cent were males and 31.66 per cent females. The second three columns of the table shows that a total of 321,475 persons both sexes were placed in positions, this gives an average of 40,184 for each year. The males comprising 66.72 per cent and the females 33.28 per cent.

Considering both sexes for the eight years, it is shown that 87.9

per cent of applicants for work were placed in positions.

Table 8—Number of Applications for Employment and Positions Secured, for Eight Years.

Table 9 presents the other parts of Tables 6 and 7, that is, the number of applications of employers for help and the number supplied. The total number of employers applying for help during the eight years, shown in the first three columns, was 377,159; of this number 63.29 per cent was for male help and 26.71 per cent for female. The average of the whole number being 47,145 for each of the eight years. The last three columns of the table shows the help supplied; the number in these columns are identical with those shown in like columns of Table 8.

The proportion of help supplied during these years equaled 89.9 per cent for males and 77.27 per cent for females, or 85.24 per cent for both sexes.

The work of these offices during the eight years they have been operating, considered as supply and demand in the labor market, it is shown that the supply has been represented by 365,727 individual applicants for employment and the demand by 377,159 individual employers wanting help. The demand numbering 11,432 or 3.1 per cent in excess of the supply.

#### SKILLED AND UNSKILLED LABOR.

Table 11 presents the number of both sexes registering for employment, classified as skilled labor, for eight years, drawn from Tables 6 and 7. The grouping is for four distinct classes of employment or callings; clerical, commercial, professional and trades. In parallel columns will be found the number of individual employers registering as applying for help qualified in these classes of services; also the number placed in the several positions embraced in the classification; and finally the last two columns of the table give the percentages of positions secured and help furnished. For the eight years 57.50 per cent of males and 58.57 per cent of females, registering for employment in the four classes, have been placed in positions; while the employers desiring the varied services of persons included in these classes were served, 81.46 per cent with male help and 68.58 per cent with female help.

Table 11—Skilled Labor, Males and Females, Number of Applicants for Employment and Help, Positions Secured, with Percentages for Eight Years.

Classification—Skilled.	OF APP	MBER LICANTS R—	Number of positions	PERCENTAGES OF POSITIONS SECURED FOR—				
	Employ- ment.	Help.	secured.	Employ- ment.	Help.			
Eight years-Males	33, 504	23, 649	19, 264	57.50	81.46			
Clerical	4, 058	1, 653	1,598	39.38	96.67			
Commercial	7, 186	5, 155	4, 189	58.29	81.26			
Professional	278	170	157	56.47	92.35			
Trades	21, 982	16,671	13, 320	60.60	79.90			
Eight years-Females	6,925	5, 914	4,056	58.57	68.58			
Clerical	2,041	832	666	32.63	80.05

Both sexes	40, 429	29, 563	23, 320	57.68	78.88			

Table 12 presents the record for unskilled labor for eight years. The showing is for four classes for males and two classes for females, with a miscellaneous class in each. It will be noticed here that the percentages of applicants for employment placed in positions, is much higher than in skilled labor; this is also to be observed in the numbers engaged by employers.

#### LEADING OCCUPATIONS.

Table 17 presents the applications for employment and for help, also the positions secured with percentages in each occupation securing

work and help.

In this showing the greater proportion of occupations, heretofore shown in detail, have been eliminated, however, the great majority of the individuals are represented. For males this table shows only 28 of the 174 occupations shown in Table 13, but represents 81.2 per cent of the applications for employment; 81.4 per cent of those applying for help and 81.1 per cent of positions secured and supplied.

For females 19 occupations are shown out of the 57 given in Table 13, these however, represent 90 per cent of those applying for work; 87.8 per cent of those wanting help and 89.2 per cent of positions sup-

plied.

Table 17—Summary of the Leading Occupations, Showing Applications for Employment and Help, with Percentages.

#### RECAPITULATION OF GROUPING.

Table 19 brings together the totals of the several groups of occupations of both sexes, and shows the per cent that each bears to the total under each stipulation. For males 40.79 per cent of the applicants for employment was for manual labor; this class also comprises 44.20 per cent of the positions secured and 45.38 per cent of the demand for this class of help. For females 88.26 per cent applied for employment in some kind of domestic service; 88.81 per cent was given positions for this class of work, supplying 89.13 per cent of the demand.

#### Percentages of Positions Secured.

Table 20 shows the percentages of the positions secured to the applicants for employment, and for the help furnished to the employers. These percentages are derived from Table 19; the miscellaneous class of both sexes has been omitted. The highest percentages of positions secured for males was reached for manual labor, the lowest for clerical service. For the same help furnished to employers was 98.80 per cent in domestic service as the highest, the lowest being 79.52 per cent in trades.

For females the positions secured applicants for employment in domestic service was 93.07 per cent, the highest, and in clerical service 51.28 per cent, the lowest.

Considering the totals in the industries named in the table, it is found that 92.92 per cent of all applicants for employment were secured positions and 82.66 per cent of all employers were provided with help.

Table 22 shows the ages of both sexes of applicants for employment grouped in ten year periods and under the classified occupations.

The first line of the table shows the percentages of both sexes, the second line for males and the third line for females. Of the males 4,924 or 11.15 per cent were under 20 years of age; 30,842 or 69,84 per cent were between the ages of 20 and 40 years; 8,137 or 18.42 per cent from 40 to 60 years, and 261 or six tenths of 1 per cent over 60 years. Of the females 2,105 or 15.58 per cent were under 20 years of age; 8,948 or 66.24 per cent between the ages of 20 and 40 years; 2,442 or 18.09 per cent between 40 and 60 years, and nine tenths of 1 per cent over 60 years.

### CONJUGAL RELATIONSHIP, ETC.

Table 23 presents by industries and occupations the conjugal conditions of all applicants for employment. The table also shows the number of trade union members registering for employment; the number reporting losing time and the average days of idleness, and the number willing to accept positions outside of the cities wherein these offices are located.

Table 23—Conjugal Conditions, Members of Trades Unions, Days Idle, and Number Willing to Accept Work Out of City.

Table 24 is a summary of Table 23, showing the number of persons both sexes, by industries, and percentages of the whole number married or unmarried; members of trade unions, and of those willing to accept work outside of cities.

Of the total number of males 29.04 per cent were married and 70.96 per cent single; 4.21 per cent were trade union members and 30 per cent were willing to accept work away from the cities. Of the females 36.59 per cent were married and 63.41 per cent were single; only ten per cent were willing to accept work away from the cities.

The whole number of all applicants reporting losing time was 46,303

with an average of nine days of idleness.

The male applicants reported 10,475 dependent children, the females 3,478 making a total of 13,953. For the married men this would be 79 children to every 100; for the married women 67 children to every 100; and for both sexes 76 children to every 100 married persons.

# NORTH SIDE FREE EMPLOYMENT OFFICE, 259-261 NORTH CLARK STREET, CHICAGO.

NINTH ANNUAL REPORT FOR THE YEAR ENDED SEPT. 30, 1907.

(John E. Huffmeyer, Superintendent.)

Hon. David Ross, Secretary of Bureau of Labor Statistics, Springfield, Ill.:

Sir—In compliance with section six of the act of the General Assembly, creating the Illinois Free Employment Offices, I herewith submit the ninth annual report of the business of the North Side Office for the year ended Sept. 30, 1907, together with the expense of maintaining the office for the same period.

This report will give in detail the work of this office for the time herein

stated.

Respectfully submitted,

John E. Hufmeyer, Superintendent.

SOUTH SIDE FREE EMPLOYMENT OFFICE, 429-431 WABASH AVENUE, CHICAGO.

NINTH ANNUAL REPORT FOR THE YEAR ENDED SEPT. 30, 1907.

(W. H. Cruden, Superintendent.)

Hon, David Ross, Secretary of the Bureau of Labor, Springfield, Ill.:

Sir—Complying with section 6 of the act of the General Assembly creating the Illinois Free Employment Offices, I herewith submit the ninth annual report of the business of the South Side Office for the year ended Sept. 30, 1997, together with the expense of maintaining the office for the period.

Our increase of work with parole prisoners takes something from the expense account and in that connection I might say now, that since making our last report we have received through this office from Joliet, twenty-four (24) prisoners on parole; four (4) discharged prisoners presenting themselves from that institution for work, and were placed accordingly; from the reformatory we had twenty-three (23) men, and ninety (90) prisoners from Menard, making a total of one hundred and ninety (190) on parole, since the inception of the work, Sept. 1, 1906, during which time thirty (30) have faithfully served their parole, and have been granted their final order of discharge, and others are becoming eligible every month from now on, for their discharge.

At the end of another year, we will be better able to determine the extent of what can be done in this line, and also be better able to speak with intelligence about the advisability of caring for prisoners by this method.

I say this because you will observe that the number of men received from the Joliet penitentiary are few compared with the southern penitentiary, and this because of the objection of the warden to our ability to give these prisoners the proper surveillance. I am making investigations that will

properly determine this question in the near future.

The report sent you under separate cover regarding the number of positions secured, etc., through our free employment office shows an increase of positions secured over last year of 2.122. This is more than I had expected when making my last report, at which time I thought that we had about reached our limit. The report does show, however, that we secured positions for fewer females this year than we did last year. There may be various reasons for this. The class applying for positions at this office have been such, many times, that we did not desire to send them to our applicants, and have informed them that unless their mode of living was advanced, we could not place them. Consequently the report shows that more of our applicants for help this year have been unsupplied. Domestics have been in great demand, but the respectable girl who is willing to work, is generally employed, showing conclusively that the way to solve the domestic help problem is to teach the shiftless domestic that she must be very careful about her moral character.

Regarding the male help I might say, that we find quite a number of men who have positions, wishing to register with us so that they may obtain better positions. This class of applicants are informed that it would not be just to devote much of our time for their advancement. That the bureau was created for the purpose of finding employment for those who are without work or means to otherwise obtain it. Consequently we are supplying unskilled labor more than anything else, which is a natural condition, seeing that the trades unions supply the demand for mechanics, and considering the number of licensed private employment agencies and others maintained by various mercantile houses, it is surprising that we get an opportunity to fill as many positions as we do, which shows that the bureau is necessary and appreciated.

Our experience with the opening of the office earlier has proved of little advantage, especially to the female department, about which the superintendent of the Peoria office said, would prove beneficial for those seeking washwomen. We found very few calls for such help at the early hour. Our people make requests for such help the day before, and if the help so employed on not report for work, it is eight or nine o'clock before they discover they have been disappointed. Hence the early hour is of no advantage to us.

The system now in practice regarding the monthly report to you about licensed private employment agencies, makes it unnecessary to make much of a statement at this time. Sufficient to say that outside of the salaries paid from the license fee fund, there has only been an expenditure of \$118.85 for legal services connected therewith, which includes the work done in an effort to have passed the bill regulating private employment agencies, which shows that these agencies are being so operated that the complaints against them are not of a serious nature, strict surveillance having convinced them that the law must not be violated. Those agents who have gone out of business, you have a record of, sent you monthly, and the late investigation made by the State Auditor makes it unnecessary for me to say anything about the fees received or licenses issued, his report being satisfactory on that point.

Respectfully submitted.

WM. H. CRUDEN. Superintendent.
